## Chapter 1 Overview of Nursing Process, Clinical Reasoning, and Nursing Practice Today 1

- Nursing Process: The Foundation for Clinical Reasoning 2
- Goals of Nursing 4
- Critical Thinking Versus Clinical Reasoning 4
- How the Nursing Process Promotes Safe, Effective Reasoning 5
- Nursing Process Phases 6
  - Five Phases 7
  - Relationships Among the Phases 9
- Benefits of Using the Nursing Process 13
- Nursing Process in Context of Today's Clinical Setting 13
  - Patient Safety and Welfare Is Top Priority 14
  - Quality and Safety Education for Nurses Competencies 15
  - Legal and Scope of Practice Concerns 16
  - Giving Ethical Patient-Centered Care 16
  - Additional Clinical Issues Impacting Reasoning 18
- Developing Critical Thinking and Clinical Reasoning Skills 29
  - Critical Thinking Indicators 29
  - The 4-Circle CT Model 29
  - Using Simulation and Debriefing 33
- Willingness and Ability to Care 35
  - Willingness to Care 35
  - Being Able to Care 36

## Chapter 2 Assessment 45

- Assessment: The Key to Safety, Accuracy, and Efficiency 46
- Assessments that Promote Sound Clinical Reasoning 47
- Six Phases of Assessment 48
- Collecting Data 49
  - What Resources Do You Use? 49
  - Ensuring Comprehensive Data Collection 50

<b>Data Base, Focus, and Quick Priority Assessments</b>	<b>50</b>
Data Base (Start of Care) Assessment	51
Focus Assessment	55
Quick Priority Assessments (QPA)	55
<b>Standard Tools, Evidence-Based Practice, and Electronic Health Records</b>	<b>57</b>
<b>Assessing Disease and Disability Management</b>	<b>59</b>
<b>Health Promotion: Screening for Risk Management and Early Diagnosis</b>	<b>60</b>
Partnering With Patients to Make Informed Decisions	60
<b>Ethical, Cultural, and Spiritual Concerns</b>	<b>61</b>
<b>The Interview and Physical Assessment</b>	<b>62</b>
Developing Your Interviewing Skills	62
Guidelines: Promoting a Caring Interview	62
Developing Your Physical Assessment Skills	66
Guidelines: Performing a Physical Assessment	66
Checking Diagnostic Studies	68
<b>Identifying Subjective and Objective Data</b>	<b>71</b>
<b>Identifying Cues and Making Inferences</b>	<b>72</b>
<b>Validating (Verifying) Data</b>	<b>72</b>
Guidelines: Validating (Verifying) Data	73
<b>Clustering Related Data</b>	<b>75</b>
Clustering Data According to Your Purpose	76
<b>Identifying Patterns/Testing First Impressions</b>	<b>80</b>
<b>Reporting and Recording</b>	<b>81</b>
Reporting and Recording Abnormal Findings	81
Deciding What's Abnormal	81
Guidelines: Reporting and Recording	82

## **Chapter 3 Diagnosis 89**

<b>Diagnosis: Identifying Actual and Potential Problems</b>	<b>90</b>
What ANA Standards Say	92
Diagnosis and Accountability	92
<b>Increased Responsibilities Related to Diagnosis</b>	<b>92</b>
<b>Shifting to a Predictive Care Model (Predict, Prevent, Manage, Promote)</b>	<b>93</b>
Failure to Rescue and Rapid Response Teams	94
Provider-Preventable Conditions and Health	
Care-Acquired Conditions	95
Clinical Pathways (Care Maps)	96
Point-of-Care Testing	97
Disease and Disability Management	97
Informatics and Electronic Decision Support	97

<b>Nursing Versus Medical Diagnoses</b>	<b>98</b>
<b>Using Standard Terminology</b>	<b>98</b>
ANA-Recognized Terminologies	100
Standard Medical Terms	101
How Do You Know What Terms to Use?	102
<b>Becoming a Competent Diagnostician</b>	<b>103</b>
Key Terms Related to Diagnosis	103
Fundamental Principles of Diagnostic Reasoning	106
<b>Mapping Diagnoses/Problems</b>	<b>111</b>
<b>Be on Your Patients' S.I.D.E.</b>	<b>116</b>
Recording Summary Statements Using the PES or PRS Format	117
<b>Identifying Potential Complications</b>	<b>119</b>
Guidelines: Identifying PCs	119
<b>Identifying Problems Requiring Multidisciplinary Care</b>	<b>121</b>

## **Chapter 4 Planning 128**

<b>Clinical Reasoning During Planning</b>	<b>129</b>
<b>Four Main Purposes of the Plan of Care</b>	<b>130</b>
<b>Standard and Electronic Plans</b>	<b>130</b>
<b>Patient Safety, Infection Prevention, and Pain and Restraint Management</b>	<b>131</b>
<b>Attending to Urgent Priorities</b>	<b>131</b>
<b>Clarifying Expected Outcomes (Results)</b>	<b>133</b>
Goals, Objectives, Outcomes, and Indicators	133
Principles of Patient-Centered Outcomes	134
Guidelines: Determining Patient-Centered Outcomes	136
Relationship of Outcomes to Accountability	136
Clinical, Functional, and Quality-of-Life Outcomes	137
Discharge Outcomes and Discharge Planning	138
<b>Case Management</b>	<b>139</b>
<b>Deciding Which Problems Must be Recorded</b>	<b>139</b>
<b>Determining Nursing Interventions</b>	<b>142</b>
<b>Assessment—Monitoring Health Status and Responses to Care (Surveillance)</b>	<b>143</b>
<b>Patient Education—Empowering Patients and Families</b>	<b>143</b>
Guidelines: Planning Patient Education	144
<b>Counseling and Coaching: Helping People Make Informed Choices</b>	<b>144</b>
<b>Consulting and Referring: Key to Multidisciplinary Care</b>	<b>145</b>

- Individualizing Interventions 145
  - Evidence-Based Practice: Weigh Risks and Benefits 146
- Individualizing Nursing Orders 148
- Making Sure the Plan is Adequately Recorded 149
  - Addressing Patient Needs on Multidisciplinary Plans 152

## Chapter 5 Implementation 159

- Implementation: Putting the Plan into Action 160
- Giving and Taking Reports (Hand-Offs) 162
  - Guidelines: Giving Reports (Hand-Offs) 162
- Setting Daily Priorities 163
  - Guidelines: Prioritizing Care for Several Patients 164
- When and How to Delegate 165
- Coordinating Care 167
- Surveillance—Preventing Errors and Omissions—Creating Safety Nets 168
  - How to Identify, Interrupt, and Correct Errors 168
  - Keeping an Open Mind 168
- Performing Nursing Interventions 170
  - Be Proactive—Promote Safety, Comfort, and Efficiency 170
- Implementation and Evidence-Based Practice 170
  - Guidelines: Preparing to Perform Interventions 170
  - Clinical Reasoning—What to Do When Things Go Wrong 171
- Standard Plans and Care Variances 172
- Ethical and Legal Concerns 172
- Charting 176
  - Six Purposes of Charting 176
  - Various Ways of Charting 177
- Principles of Effective Charting 178
  - Avoiding Dumping Syndrome With Electronic Charting 181
  - Learning to Chart Effectively 181
  - Guidelines: Charting During Implementation 181
  - Charting Memory-Jogs 183
- Keeping the Plan Up-to-Date and Evaluating Your Day 183

## Chapter 6 Evaluation 188

- Evaluation: Key to Excellence in Nursing 189
- Evaluation and the Other Phases of Nursing Process 189

**Evaluating an Individual Plan of Care 190**

Guidelines: Determining Outcome Achievement 190

Identifying Variables (Factors) Affecting Outcome Achievement 191

Deciding Whether to Discharge the Patient 191

**Quality Improvement 193****Research and Evidence-Based Practice 194**

Reflective Practice 194

Consumer Satisfaction—Maximizing Value 195

Examining How Health Care Systems Affect Outcomes 195

Three Types of Evaluation: Outcome, Process, and Structure 196

Staff Nurses' Responsibilities 197

Examining Mistakes, Infections, and Injuries 197

**Example Responses to Critical Thinking and Clinical Reasoning Exercises 203****Appendices***Appendix A: Example Critical Pathway 213**Appendix B: Building Healthy Workplaces and Safety and Learning Cultures 219**Appendix C: Key Elements of Critical Thinking in Context of ANA Standards and QSEN and IOM Competencies 221**Appendix D: DEAD ON!! A Critical Thinking and Clinical Reasoning Game 223***Glossary 225****Index 229**
