<i>Preface</i>	xiii
<i>Contributors</i>	xv
<b>1 Labour and normal birth – <i>Cathy Charles</i></b>	<b>1</b>
Introduction	1
The birth environment	3
Signs that precede labour	5
First stage of labour	6
Second stage of labour	18
Pushing	20
The birth	22
Third stage of labour	25
After the birth	30
Summary	31
Useful contacts and information	32
References	32
<b>2 Vaginal examinations and artificial rupture of the membranes – <i>Vicky Chapman</i></b>	<b>39</b>
Vaginal examinations	39
Accuracy and timing of VEs	40
Consent or compliance?	41
Performing a VE	42
Some common problems	45
Artificial rupture of the membranes	47
Summary	49
References	49
<b>3 Fetal heart rate monitoring in labour – <i>Bryony Read</i></b>	<b>52</b>
Introduction	52
Intermittent auscultation	52
Electronic fetal monitoring	54
Fetal scalp electrode	56
Classification of fetal heart rate features	56
Positive and negative aspects of EFM	59
Summary	60
References	61
Appendix: Continuous EFM algorithm (NICE, 2007)	63

<b>4</b>	<b>Perineal trauma and suturing</b> – <i>Vicky Chapman</i>	<b>64</b>
	Introduction	64
	Reducing perineal trauma	65
	Assessment of perineal trauma	66
	First and second degree tears: to suture or not to suture?	67
	Suturing procedure	69
	Summary	82
	Recommended reading	82
	References	82
<b>5</b>	<b>Examination of the newborn baby at birth</b> – <i>Caroline Rutter</i>	<b>86</b>
	Introduction	86
	The midwife's assessment of the baby at birth	87
	Measurements of the newborn	89
	Vitamin K prophylaxis	90
	Top-to-toe check	91
	Neonatal infection	96
	Giving upsetting news to parents	98
	Useful contacts	99
	References	99
<b>6</b>	<b>Home birth</b> – <i>Janet Gwillim and Cathy Charles</i>	<b>102</b>
	Introduction	102
	Benefits of home birth	103
	Issues to consider before choosing home birth	104
	Preparing for a home birth	106
	Care in labour	108
	Possible transfer to hospital	112
	Summary	115
	Useful contacts	115
	References	115
<b>7</b>	<b>Water for labour and birth</b> – <i>Cathy Charles</i>	<b>117</b>
	Introduction	117
	Benefits of warm water immersion	118
	Possible risks of warm water immersion	119
	Criteria for labouring in water	120
	Relative contraindications	120
	Preparation	121
	Labour care	123
	Possible problems	125
	Summary	127
	Useful contacts	128
	Recommended reading	128
	References	128

<b>8 Malpositions and malpresentations in labour – Vicky Chapman</b>	<b>130</b>
Introduction	130
Definitions	130
Occipitoposterior position	133
Face presentation	140
Brow presentation	141
Transverse lie (shoulder presentation)	142
Summary	143
References	144
<b>9 Slow progress in labour – Vicky Chapman</b>	<b>146</b>
Introduction	146
Prolonged labour	147
Causes of a prolonged labour	148
Prolonged latent phase	149
Prolonged active first stage	150
Prolonged second stage	153
Summary	155
Recommended reading	156
References	156
<b>10 Assisted birth: ventouse and forceps – Cathy Charles</b>	<b>160</b>
Introduction	160
Avoiding an instrumental delivery	161
Indications for an instrumental delivery	161
Types of instrument	162
Choice of instrument	162
Care of a woman undergoing instrumental delivery	163
Assisting at an instrumental delivery	166
Midwife instrumental delivery	167
Post-birth discussion and care	172
Summary	174
References	174
Appendix 10.1 Midwife ventouse practitioner log book record	177
Appendix 10.2 Decision to decline midwife ventouse delivery	178
<b>11 Caesarean section – Cathy Charles</b>	<b>179</b>
Introduction	179
Risks and benefits of CS	180
Stemming the flow	182
Indications for elective CS	183
The experience of CS	183
Elective CS birth plan	184
Midwifery care for CS	184
Summary	189
Support groups for women following CS	190
Further reading	190
References	190

<b>12</b>	<b>Vaginal birth after caesarean section – Vicky Chapman</b>	<b>193</b>
	Introduction	193
	The influence and opinions of professionals	194
	VBAC or elective CS	194
	What improves the success rate in VBAC?	196
	Induction of labour for VBAC	196
	Midwifery care for VBAC labour	197
	Summary	201
	References	201
<b>13</b>	<b>Preterm birth – Charlise Adams</b>	<b>204</b>
	Introduction	204
	Incidence and facts	205
	Causes and associated factors of preterm birth	206
	Place of delivery	206
	Preterm prelabour rupture of membranes (PPROM)	206
	Corticosteroids for threatened preterm birth	208
	Tocolysis in threatened preterm labour	208
	Monitoring the fetal heart in preterm labour	209
	Midwifery care	209
	Mode of delivery	210
	Care immediately after birth	211
	Skin-to-skin contact	212
	Resuscitation	213
	Care related to specific types of preterm labour	214
	Postnatal care	215
	Summary	216
	Useful contacts	217
	References	217
<b>14</b>	<b>Breech birth – Lesley Shuttler</b>	<b>220</b>
	Introduction	220
	Types of breech presentation	221
	Women's options and the provision of care	223
	Concerns and possible complications with a breech birth	225
	Labour and birth	226
	Summary	236
	Useful contacts	236
	Recommended reading	236
	References	236
<b>15</b>	<b>Twins and higher-order births – Jo Coggins</b>	<b>240</b>
	Introduction	240
	Place of delivery	241
	Mode of delivery	241

Care in labour	243
Third stage of labour	246
Care after the birth	248
Summary	249
Useful contacts	249
References	249
<b>16 Haemorrhage – Sheila Miskelly</b>	<b>252</b>
Introduction	252
Placenta praevia	253
Vasa praevia	255
Placental abruption	255
Postpartum haemorrhage	260
The 4Ts: Tone, Tissue, Trauma, Thrombophilias	261
Retained placenta	265
Summary	267
References	268
<b>17 Emergencies in labour and birth – Sheila Miskelly</b>	<b>271</b>
Introduction	271
Snapped cord	272
Cord prolapse and cord presentation	272
Amniotic fluid embolism	274
Uterine rupture	276
Shoulder dystocia	278
Inverted uterus	284
Maternal collapse/shock	286
Summary	287
References	288
<b>18 Neonatal and maternal resuscitation – Nick Castle</b>	<b>292</b>
Introduction	292
Risk management: anticipation	293
Basic neonatal resuscitation	293
Ongoing neonatal resuscitation/complications	297
Maternal resuscitation	301
Summary	304
References	304
<b>19 Induction of labour – Mary-Lou Elliott</b>	<b>306</b>
Introduction	306
Risks and side effects	307
Information giving and informed consent	308
Determining expected date of delivery (EDD)	308
IOL for social reasons	309
Induction for post-term pregnancy	309
IOL versus expectant management for PROM at term	309

Assessing the cervix	310
Methods of induction	310
Care of a woman during IOL	313
Summary	315
Recommended reading	316
References	316
<b>20 Pre-eclampsia – Annette Briley</b>	<b>318</b>
Introduction	318
Signs and symptoms	321
Care during labour	323
Monitoring the maternal and fetal condition in moderate/severe pre-eclampsia	324
Drugs used in the treatment of severe hypertension	326
Management of eclampsia	327
Care during/following an eclamptic fit	328
HELLP syndrome	330
Summary	332
Useful resources	333
References	333
<b>21 Stillbirth and neonatal death – Barbara Kavanagh and Cathy Charles</b>	<b>336</b>
Introduction	336
Definition	337
Incidence and facts	337
Causes and predisposing factors for perinatal death	337
Diagnosing fetal death and decision making	338
Midwifery care in labour following intrauterine death	341
Neonatal death and unexpected death at/after birth	342
Immediate care following stillbirth/NND: precious moments with the baby	343
Ongoing postnatal care	345
Supporting staff	349
Summary	350
Useful contacts	350
References	350
Appendix: Checklist following a pregnancy loss after 24 weeks	353
<b>22 Risk management, litigation and complaints – Cathy Charles</b>	<b>355</b>
Introduction	355
Clinical risk management: learning from adverse events	356
Litigation	357
Vicarious liability of employer	358
Clinical risk management organisations	359
Records	359
Complaints	360
Writing a statement	360

---

Caring for the mother or father following an adverse event	361
Conclusion	361
Summary	362
Useful contacts	362
References	362
<b>23 Intrapartum blood tests – Vicky Chapman and Julie Davis</b>	<b>364</b>
Blood tests	364
Haematology and coagulopathy	370
Blood bank (immunohaematology)	373
Blood tests for specific conditions and blood pictures	374
Fetal blood tests	376
References	379
<b>24 Medicines and the midwife – Vicky Chapman</b>	<b>381</b>
Introduction	381
Midwife exemption orders	382
Standing orders	385
Patient group directions (PGDs)	385
Documentation and drug errors	385
Common abbreviations	387
Useful contacts	388
References	388
