Nursing2013 survey results: Drug administration by enteral feeding tube

By Peggi Guenter, PhD, RN, and Joseph
Boullata, PharmD, RPh, BCNSP

Last spring, Nursing2013 surveyed practicing nurses nationwide to determine what they know—and don't know—about evidence-based guidelines for medication administration via enteral feeding tubes. Find out if you're meeting current standards by reviewing these survey results, which include best practices and evidence-based rationales.

CE CONNECTION

42

Preventing postoperative nausea and vomiting

By Mary H. Tinsley, ADN, RN, and
Claudia P. Barone, RN, APN, CCNS-BC,
CPC, LNC

PONV isn't just unpleasant, it's potentially dangerous. Learn to apply effective nursing interventions that can minimize problems by reviewing the latest guidelines about prevention and treatment presented here.

For immediate CE test processing, see our website at <http://www.nursingcenter.com/ce/nursing>.

36 PATIENT EDUCATION SERIES

Panic attacks

Teach your patients about these frightening episodes, then give them this handout to take home.

37 Performing a focused neurologic assessment

By Wendi Rank, CRNP, CNRN

No matter where you work, you need to be prepared to perform this critical assessment and tailor it to a patient's clinical status. Helpful tips from the author's own experiences will guide you.

41 SHARING

Moving toward the light

By Samuel Franklin Engs, BA, BSN, RN

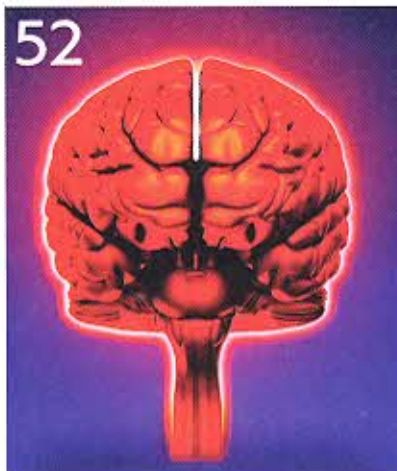

A dramatic turn of events reminds a hospice nurse how little we know about death.

52 Fire up to beat the threat of bacterial meningitis

By April Miller, MSN, RN, CCRN, CNS

When bacterial meningitis strikes, rapid assessment, diagnosis, and treatment can save the patient's life. Be prepared to act fast to prevent death or serious complications such as brain damage.
