Reviewers *x*
Appreciations and Acknowledgments *xi*

PART ONE:

Introduction to Wound Care 1

1 The Wound Care Process3

Step 1: Assessment 3
 Review of Admission/Referral 4
 Patient History 4
 Systems Review and Physical Assessment 6
 Wound Assessment 7
 Patient Candidacy for Specialized Services 7
Step 2: Diagnosis 7
 Examination Strategy 7
 Evaluation and Diagnosis 8
Step 3: Prognosis and Goals 8
 Wound Prognosis Options 9
 Goals 9
 Evaluation of Progress and Outcomes 9
Reevaluation 12
Conclusion 12
■ REVIEW QUESTIONS 12
■ REFERENCES 13

2 Skin and Soft Tissue Anatomy and Wound Healing Physiology.....17

Anatomy and Physiology of the Skin and Soft Tissues 17
 Young Skin 17
 Basement Membrane and Dermal-Epidermal Junction 20
 Dermal Appendages 20
 Dermis 20
 Aged Skin 21
 Other Soft Tissue Types and the Skeleton 22
Wound Healing Physiology: An Overview 25
 Superficial Wound Healing 25
 Partial-Thickness Wound Healing 27
 Full-Thickness or Secondary Intention Healing 27
 Chronic Wound Healing 28
 Four Phases of Wound Healing 29
Inflammatory Phase 33
 Platelets, Hemostasis, and the Coagulation Cascade 34
Hypothermia, Platelet Activation, and The Coagulation Cascade 36
 Wound Space Hypoxia and Regulation via the Oxygen-Tension Gradient 36
 Oxygen and Antibacterial Effects 37
 Nitric Oxide and Cellular Signaling 38
Vasodilation 38
 The Complement System 38
 Neutrophils 38
 Mast Cells 39
 Macrophages 39
 Fibroblasts 39
 Current of Injury 40

Inflammatory Phase in Chronic Wounds 40
 Stimulus for Repair 40
 Inadequate Perfusion and Ischemia 40
 Free Radicals 41
 Oxygen Reperfusion Injury 41
Epithelialization Phase 41
 Role of Keratinocytes 41
Epithelialization Phase in Chronic Wounds 42
Proliferative Phase 42
 Integrins 43
 Growth Factors—Proliferative Phase 43
 Angiogenesis 43
 Fibroblasts 43
 Collagen Types 44
 Matrix Formation 44
 Cross-Linking of Collagen 44
 Ground Substance 44
 Myofibroblasts and Contraction 44
Proliferative Phase in Chronic Wounds 45
 Fibroblast Senescence 45
 Fibronectin Composition 45
 Chronic Wound Fluid 45
 Prolonged Inflammatory and Proliferative Responses 46
 Dead Space or Large Tissue Gap 46
Remodeling Phase 46
 Matrix Remodeling 46
 Matrix Metalloproteinases and Collagen Lysis or Degradation 46
 Scar Formation 47
Remodeling Phase in Chronic Wounds 47
Summary 48
■ REVIEW QUESTIONS 49
■ REFERENCES 49

3 Assessment of the Patient, Skin, and Wound53

Factors Affecting Wound Healing 53
 The Patient's Health Status 53
 Iatrogenic Factors in Chronic Wound Healing 59
The Wound Assessment Process 60
 Purpose and Frequency 60
 Data Collection and Documentation: Forms and Procedures 61
Assessment of Skin and Wound Attributes 61
 Observation and Palpation Techniques 62
 Assessment of Adjacent and Periwound Tissues 63
Wound Classification Systems 76
 Differential Diagnosis of Wound Etiology 76
 Wound Classification Systems 77
 Classification by Depth of Tissue Injury 77
 National Pressure Ulcer Advisor Panel Pressure Ulcer Staging System 78
 Wagner Ulcer Grade Classification 82
 The University of Texas Treatment-Based Diabetic Foot Classification System 82
 Marion Laboratories Red, Yellow, Black Classification System 83
Wound Severity Diagnosis 83
Evaluation of Wound Healing Status 83
 Identifying the Aspect of the Wound Healing Phase 84
 Identifying the Wound Healing Phase Diagnosis 84

Assessing Wounds in The Inflammatory Phase	85
<i>Acute Inflammation</i>	85
<i>Chronic Inflammation</i>	88
<i>Absence of Inflammation</i>	93
Assessing Wounds in The Proliferative Phase	93
<i>Acute Proliferative Phase</i>	95
<i>Chronic Proliferative Phase</i>	96
<i>Absence of Proliferative Phase</i>	97
Assessing Wounds in The Epithelialization Phase	98
<i>Acute Epithelialization Phase</i>	98
<i>Chronic Epithelialization Phase</i>	100
<i>Absence of Epithelialization Phase</i>	102
Referral Criteria	104
Self-Care Teaching Guidelines	105
Conclusion	105
■ REVIEW QUESTIONS	106

4 Wound Measurements and Prediction of Healing	110
Initial Considerations in Wound Measurement	110
<i>Frequency of Baseline and Subsequent Measurements</i>	110
<i>Documenting the Wound Location</i>	111
<i>Using Measurement Forms</i>	111
<i>Promoting Accuracy and Reliability of Wound Measurements</i>	112
<i>Comparing the Three Methods of Wound Measurement</i>	113
Wound Measurement: Linear Methods	114
<i>Measuring the Surface Area</i>	114
<i>Measuring Undermining and Tunneling</i>	116
<i>Graphing the Trajectory and Percentage of Healing</i>	120
<i>Measuring Wound Depth</i>	122
<i>Measuring Wound Volume</i>	122
<i>Measuring Surrounding Skin Erythema</i>	123
Wound Measurement: Wound Tracings	123
<i>Applications of Tracings</i>	124
<i>Steps for Making a Wound Tracing</i>	124
<i>Optional Additions to Tracings</i>	124
<i>Using a Wound Recovery Form</i>	126
Wound Measurement: Wound Photography	126
<i>Use of Serial Photographs</i>	126
<i>Choosing the Equipment</i>	126
<i>Taking a High-Quality Photograph</i>	127
<i>Using a Photographic Wound Assessment Tool</i>	127
<i>Use of Video Teleconferencing</i>	127
Referral Criteria and Sources	128
Self-Care Guidelines	128
<i>Instructions for Measuring a Wound at Home</i>	128
<i>Instructions for Making a Wound Tracing at Home</i>	129
Conclusion	129
Resources	129
■ REVIEW QUESTIONS	129
■ REFERENCES	129
■ SUGGESTED READINGS	130
5 Tools to Measure Wound Healing	131
Criteria For Evaluating Wound Healing Tools	131
<i>Validity</i>	131
<i>Reliability</i>	132
<i>Responsiveness</i>	132
<i>Clinical Practicality</i>	133
Wound Characteristics Assessed in Wound Healing Measurement Tools	133
<i>Location</i>	133
<i>Shape</i>	133
<i>Size</i>	133
<i>Depth</i>	134
<i>Edges</i>	134
<i>Undermining/Tunneling</i>	134
<i>Necrosis</i>	135
<i>Exudate/Drainage</i>	135
<i>Surrounding Skin Characteristics</i>	135
<i>Granulation Tissue</i>	135
<i>Epithelialization</i>	136
<i>Use of Wound Characteristics Assessment in Specific Measurement Tools</i>	136
Sussman Wound Healing Tool	137
<i>Development of the SWHT</i>	137
<i>Use of the SWHT</i>	138
<i>Explanations of SWHT Attributes</i>	139
<i>SWHT Reliability and Practicality</i>	140
<i>Assessment of Treatment Outcomes</i>	140
<i>SWHT Forms</i>	141
<i>Case Example 2 Using the SWHT</i>	142
<i>SWHT Database</i>	142
Pressure Ulcer Scale For Healing	143
<i>Development of the PUSH</i>	143
<i>Use of the PUSH</i>	143
<i>Utility of the PUSH tool</i>	143
The Bates-Jensen Wound Assessment Tool	144
<i>Development of the BWAT</i>	144
<i>Use of the BWAT</i>	145
<i>Validity and Reliability of the BWAT</i>	145
<i>Converting BWAT Scores into PUSH Scores</i>	145
<i>Utility of the BWAT</i>	146
<i>Use of BWAT Scores to Identify Severity State and Guide Treatment</i>	147
<i>Outcomes with Standardized Wound Assessment Using the BWAT</i>	154
Wound Healing Assessment Tools Developed for Specific Needs or Populations	154
<i>Photographic Wound Assessment Tool</i>	154
<i>The Wound Bed Score</i>	154
<i>The Spinal Cord Injury Pressure Ulcer Monitoring Tool (SCI-PUMT)</i>	155
Conclusion: Clinical Utility of Wound Healing Assessment Tools	155

6 Vascular Evaluation	173
Procedure for Vascular Evaluation	173
<i>Past Medical History</i>	173
<i>Physical Examination</i>	174
<i>Vascular Testing</i>	175
Noninvasive Arterial Studies	176
<i>Continuous Wave Doppler Ultrasound and the Ankle Brachial Index</i>	176
<i>Segmental and Digital Plethysmography</i>	177
<i>Arterial Duplex Scanning</i>	180
<i>Transcutaneous Oxygen Measurements</i>	180
<i>Skin Perfusion Pressures and the Laser Doppler</i>	180
<i>Magnetic Resonance Angiography</i>	181
<i>Computed Tomography Angiography</i>	182
Invasive Arterial Studies	182
Studies of Venous Insufficiency	182
<i>Ambulatory Venous Pressure Monitoring</i>	182
<i>Photoplethysmography</i>	183
<i>String Gauge Plethysmography</i>	183
<i>Air Plethysmography</i>	183
<i>Venous Duplex Scanning</i>	183
<i>Other Studies of Venous Insufficiency</i>	184
<i>Lymphoscintigraphy</i>	184
Referral Criteria	184
Self-Care Teaching Guidelines	184
<i>Self-Care Teaching Guidelines Specific to Arterial Insufficiency</i>	184

<i>Self-Care Teaching Guidelines Specific to Venous Insufficiency</i>	185
Conclusion	185
■ REVIEW QUESTIONS	185

9 Pressure Ulcers: Pathophysiology, Detection, and Prevention	230
Pressure Ulcer Significance	230
Pressure Ulcer Pathophysiology	232
<i>Pathophysiology of Pressure Ulcer Formation Intensity and Duration of Pressure</i>	232
Clinical Presentation of Pressure Ulcers	234
<i>Early Pressure-Induced Tissue Damage</i>	235
<i>Stage I Pressure Ulcers</i>	235
<i>Stage II Pressure Ulcers</i>	235
<i>Stage III and IV Pressure Ulcers</i>	235
<i>Unstageable Pressure Ulcers</i>	235
<i>Suspected Deep Tissue Injury</i>	236
<i>Location</i>	237
Pressure Ulcer Detection	238
<i>Ultrasound Evaluation of Pressure-Induced Skin and Tissue Damage</i>	239
<i>Temperature as a Method of Detecting Pressure-Induced Skin and Tissue Damage</i>	239
<i>Tissue Reflectance Spectroscopy as a Method of Detecting Pressure-Induced Skin and Tissue Damage</i>	240
<i>Subepidermal Moisture as a method of Detecting Pressure-Induced Skin and Tissue Damage</i>	241
Differential Diagnosis	241
<i>Superficial Stage II Pressure Ulcers and IAD</i>	242
<i>Skin Failure and Terminal Pressure ulcers</i>	243
Pressure Ulcer Risk Screening	244
<i>Risk Factors for Pressure Ulcer Development</i>	244
<i>Risk Screening</i>	247
<i>Risk Assessment Tools</i>	247
<i>Skin Assessment</i>	250
<i>Risk Assessment Frequency</i>	251
<i>Risk Stratification</i>	251
Pressure Ulcer Prevention Strategies	252
<i>Reduce Pressure Effects</i>	252
<i>Moisture</i>	261
<i>General Skin Care</i>	262
<i>Nutrition</i>	264
Implementing Pressure Ulcer Prevention Programs: What Works?	264
Telehealth and Pressure Ulcer Care	266
Outcome Measures	266
Referral Criteria	266
Self-Care Teaching Guidelines	267
