Contents

CHAPTER 1	Introduction to Perioperative Nursing	1
	Phases of the Surgical Experience	1
	Preoperative	1
	Intraoperative	2
	Postoperative	2
	Nursing Process Throughout the Perioperative Period	2
	Assessment	3
	Nursing Diagnoses	3
	Planning	3
	Intervention	3
	Evaluation	3
	Perioperative Nursing Data Set	4
	Patient Outcomes: Standards of Perioperative Care	4
	Roles of the Perioperative Nurse	6
	Expanded and Advanced Practice Roles	6
	Practice Settings	7
	Members and Responsibilities of the Surgical Team	7
CHAPTER 2	Preparing the Patient for Surgery	13
	Nursing Diagnoses	13
	Desired Patient Outcomes	14
	Preoperative Preparation	14
	Preoperative Assessment and Interventions	15
	Overview	15
	Sources of Patient Information	15
	Assessment Parameters	20
	<i>Physiologic</i>	20
	<i>Psychosocial</i>	22
	Nursing Diagnoses and Interventions	22
	Preoperative Period	22
	Intraoperative Period	24
	Prevention of Wrong-Site Surgery	24
	Patient/Family Teaching	25
	Communication of Relevant Patient Data	30
CHAPTER 3	Prevention of Infection: Preparation of Instruments and Items Used in Surgery: Sterilization and Disinfection	37
	Desired Patient Outcomes	37
	Sterilization and Disinfection	39
	Critical, Semicritical, and Noncritical Items	39

<i>Critical Items: Examples</i>	39
<i>Semicritical Items: Examples</i>	39
<i>Noncritical Items: Examples</i>	39
Sterility Assurance Level	39
Methods of Sterilization	40
Overview	40
Thermal Sterilization—Steam Under Pressure: Moist Heat	41
<i>Advantages of Steam Sterilization</i>	41
<i>Disadvantages of Steam Sterilization</i>	41
Steam Sterilizers: Autoclaves	42
Overview	42
Gravity Displacement	43
Dynamic Air Removal (<i>Prevacuum Sterilizer</i>)	44
Steam-Flush-Pressure-Pulse Sterilizer	45
Chemical Sterilization: Low-Temperature Hydrogen Peroxide Gas Plasma	47
Description	47
Advantages	48
Disadvantages	48
Chemical Sterilization: Low-Temperature Vapor-Phase Hydrogen Peroxide	48
Description	48
Advantages	49
Disadvantages	49
Chemical Sterilization: Ethylene Oxide Gas	49
Description	49
Advantages	49
Disadvantages	50
Liquid Chemical Sterilant Processing System	50
Description	50
Advantages	51
Disadvantages	51
Chemical Sterilization: Low-Temperature Ozone/Hydrogen Peroxide	51
Sterilization: Quality Control	52
Overview	52
Physical Monitors	53
Chemical Indicators	53
Biological Monitors	55
Rapid-Readout Biological Monitors	57
Sterilization: Documentation	57
Disinfection	58
Overview	58
Levels of Disinfectants: Application	59
<i>Glutaraldehyde</i>	59
<i>Ortho-phthalaldehyde</i>	60
<i>Hydrogen Peroxide Vapor</i>	60
Disinfection: Quality Control	60
Disinfection: Documentation	60
CHAPTER 4	
Prevention of Infection: Preparation of Instruments and Items Used in Surgery: Cleaning, Packaging, and Storage	69
Nursing Diagnosis: Desired Patient Outcomes	69
Nursing Responsibilities	70
Preparation of Items and Instruments for Sterilization	70
Cleaning	70

	<i>Intraoperative Cleaning</i>	71
	<i>Postoperative Cleaning</i>	71
	<i>Manual Cleaning</i>	71
	<i>Mechanical Cleaning</i>	72
	<i>Special Protocols</i>	72
	<i>Ultrasonic Cleaning</i>	74
	Lubrication	74
	Inspection	75
	Packaging Materials: Barriers	76
	Selection Criteria	76
	Types of Packaging	76
	<i>Overview</i>	76
	<i>Woven Fabric</i>	76
	<i>Nonwoven Materials</i>	77
	<i>Pouches: Plastic/Paper, Plastic/Tyvek</i>	77
	<i>Rigid Container Systems</i>	78
	Principles of Packaging: Steam	79
	Instruments	79
	Other Items	80
	<i>Basins, Bowls, Cups</i>	80
	<i>Impervious Material, Tubing, Items with a Lumen, Wood Items</i>	81
	<i>Reusable Textiles: Linen Packs</i>	81
	Packaging for Alternative Methods of Sterilization	82
	Package Information and Identification	83
	Chemical Indicators and Integrators	83
	Sealing	83
	Labels	83
	Shelf Life	83
	Storage Considerations	83
	Determining Factors	84
	Reuse of Single-Use Devices	84
CHAPTER 5	Prevention of Infection: Aseptic Practices: Attire, Scrubbing, Gowning, Gloving, Draping, Prepping, Creating and Maintaining a Sterile Field Operating Room Environment, and Sanitation	93
	Nursing Diagnosis: Desired Patient Outcomes	94
	Nursing Responsibilities	95
	Pathogenic Microorganisms	95
	Sources of Infection (Endogenous)	96
	Sources of Infection (Exogenous)	97
	Personnel	97
	Environment	97
	Standard and Transmission-Based Precautions	98
	Control of Sources of Infection	100
	Control of Patient Sources of Infection: Skin Prep	101
	Control of Personnel Sources of Infection	105
	<i>Attire</i>	105
	<i>Scrubbing, Gowning, and Gloving</i>	107
	Creating a Sterile Field	116
	<i>Draping</i>	116
	<i>Draping Guidelines</i>	117
	<i>Standard Drapes</i>	117
	Creating and Maintaining a Sterile Field	120

	Control of Environmental Sources of Infection	123
	<i>Traffic Patterns</i>	123
	<i>Operating-Room Environment</i>	125
	<i>Operating-Room Sanitation</i>	126
	<i>Additional Considerations: Cleaning and Scheduling</i>	129
	<i>Special Considerations</i>	129
CHAPTER 6	Prevention of Injury: Positioning the Patient for Surgery	141
	Overview	142
	Desired Patient Outcomes	142
	Impact of Surgical Positioning	142
	Overview of Injuries	142
	Respiratory and Circulatory System Compromise	143
	Neuromuscular Injury	144
	<i>Facial Nerves</i>	144
	<i>Upper Extremity Nerves</i>	145
	<i>Lower Extremity Nerves</i>	146
	Integumentary System Injury	147
	Responsibilities of the Perioperative Nurse	150
	Patient Advocate	150
	Nursing Considerations	150
	<i>Patient Assessment</i>	150
	<i>Planning Care</i>	153
	Additional Considerations for Positioning	153
	Anesthesia	153
	Patient Dignity	153
	Positioning Devices	153
	Implementation of Patient Care	156
	Transportation and Transfer	156
	Initial Position Techniques	157
	Basic Surgical Positions	158
	Supine (Dorsal Recumbent)	158
	Trendelenburg	159
	Reverse Trendelenburg	159
	Lithotomy	160
	Sitting (Semi-Sitting, Semi-Fowler's, Lawnchair)	161
	Prone	161
	Jackknife (Kraske)	162
	Lateral	163
	Positioning the Morbidly Obese Patient	165
	Evaluating Implementation of Positioning	165
	Postoperative Transfer	165
	Documentation of Nursing Actions	165
CHAPTER 7	Prevention of Retained Surgical Items	173
	Description	173
	Nursing Diagnosis: Desired Patient Outcome	173
	Overview	174
	Nursing Responsibilities	174
	Count Procedures	177
	Soft Goods Counts	177
	New Technologies	178

	Sharps and Miscellaneous Items Counts	178
	Instrument Counts	179
	Documentation	179
CHAPTER 8	Prevention of Injury: Hemostasis, Tourniquets, and Electro-surgical Equipment	189
	Hemostasis	190
	Natural Methods of Hemostasis	190
	Artificial Methods of Hemostasis	190
	<i>Chemical Hemostasis</i>	190
	<i>Mechanical Hemostasis</i>	191
	Tourniquets	192
	Overview	192
	Nursing Diagnosis: Desired Patient Outcome	193
	Nursing Interventions	193
	Electrical Hemostasis: Electrosurgery	196
	Overview	196
	Electrosurgical Components	196
	<i>Generator</i>	196
	<i>Active Electrode</i>	197
	<i>Dispersive Electrode</i>	198
	Application	199
	Nursing Diagnosis: Desired Patient Outcomes	200
	Desired Patient Outcome/Criteria	202
	Nursing Interventions: Patient and Staff Safety	202
	Electrosurgical Use During Endoscopic Surgery: Special Precautions	204
	Ultrasonic Energy Devices	205
	Overview	205
	System Components	205
	Tissue Effects	205
	Technology Characteristics	206
	Applications	206
	Argon Beam-Enhanced Electrosurgery	206
	Overview	206
	System Components	206
	Application	206
CHAPTER 9	Prevention of Injury: Use and Care of Basic Surgical Instrumentation	215
	Nursing Diagnosis: Desired Patient Outcome	215
	Overview	216
	Evolution of Surgical Instrumentation	216
	Proper Care and Handling: Departmental Impact	216
	Manufacture of Surgical Instruments	217
	Nursing Responsibilities Related to Surgical Instrumentation	218
	Loaner Instrumentation	218
	Categories of Instruments	219
	Cutting Instruments	219
	Clamps	221
	<i>Hemostatic Clamps</i>	222
	<i>Noncrushing Vascular Clamps</i>	223
	<i>Occluding Clamps</i>	223
	<i>Grasping and Holding Clamps</i>	223

Grasping Forceps	223
Retractors	223
Suction	226
Other	227
Care and Handling	229
Cleaning	229
General Guidelines for Care and Cleaning	230
Inspection	231
CHAPTER 10 Prevention of Injury: Wound Management	239
<hr/>	
Nursing Diagnoses: Desired Patient Outcomes	239
Potential Injury	239
Desired Patient Outcomes/Criteria	240
Surgical Wounds	240
Surgical Wound Classification	240
Wound Healing	242
<i>Primary, Secondary, and Tertiary Intention or Delayed Primary Closure</i>	242
<i>Process of Wound Healing</i>	242
Suture Material	244
Classification of Suture Material	244
<i>Monofilament and Multifilament Sutures</i>	244
<i>Absorbable Suture</i>	245
<i>Nonabsorbable Suture</i>	246
<i>Suture Diameter</i>	247
Suture Selection: Considerations	248
Suture Package Information	248
Surgical Needles	249
Needle Characteristics	249
Needle Attachment	249
Other Wound Closure Devices	253
Stapling Devices	253
Skin Tapes and Skin Adhesives	253
Surgical Mesh	253
Drains	254
Dressings	255
Nursing Responsibilities Related to Wound Management	255
CHAPTER 11 Prevention of Injury: Anesthesia and Medication Safety	261
<hr/>	
Potential Injury: Desired Patient Outcomes	262
Nursing Diagnoses	262
Desired Patient Outcomes	262
Outcome Criteria	262
Overview of Nursing Responsibilities	263
Preanesthesia	265
Assessment Data	265
American Society of Anesthesiologists Classification	266
Patient Teaching	266
Patient Instructions	266
Selection of Anesthetic Agents and Technique	267
Anesthesia Techniques: Overview	268
Premedication	269

114	Goals	269
115	Medications and Protocols	269
117	Monitoring	272
118	Practice Recommendations and Standards	272
119	Monitoring Devices	272
120	Monitors for Patients Receiving General Anesthesia	273
121	<i>Precordial or Esophageal Stethoscope</i>	273
122	<i>Electrocardiogram</i>	273
123	<i>Pulse Oximetry</i>	273
124	<i>Blood Pressure</i>	273
125	<i>Temperature</i>	274
126	<i>Capnography</i>	275
127	General Anesthesia	276
128	Inhalation Agents	276
129	Anesthesia Machine	277
130	Intravenous Agents	278
131	<i>Barbiturate Induction Agents</i>	279
132	<i>Nonbarbiturate Induction Agents</i>	279
133	<i>Dissociative Induction Agents</i>	279
134	<i>Narcotics</i>	280
135	<i>Tranquilizers: Benzodiazepines</i>	280
136	<i>Neuromuscular Blockers (Muscle Relaxants)</i>	280
137	Stages of Anesthesia	283
138	Preparation for Anesthesia: Nursing Responsibilities	284
139	Sequence for General Anesthesia: Nursing Responsibilities	285
140	Malignant Hyperthermia	288
141	Overview	288
142	Treatment	289
143	Nursing Responsibilities	290
144	Moderate Sedation/Analgesia	294
145	Overview	294
146	Nursing Responsibilities	295
147	Regional Anesthesia	296
148	Overview	296
149	Spinal	297
150	Epidural and Caudal	298
151	Intravenous Block (Bier Block)	299
152	Nerve Block	299
153	Local Infiltration	300
154	Topical	300
155	Regional Anesthesia: Nursing Responsibilities	300
156	Medication Safety	301
157	Overview	301
158	Responsibilities of Team Members	301
CHAPTER 12	Workplace Safety	315
159	Regulations	316
160	Standards and Recommendations	317
161	Occupational Safety and Health Administration	317
162	National Institute for Occupational Safety and Health	317
163	Environmental Protection Agency	317
164	The Joint Commission	317
165	Accreditation Association for Ambulatory Health Care	318

Healthcare Facilities Accreditation Program	318
American National Standards Institute	319
Association for the Advancement of Medical Instrumentation	319
Job Safety Analysis	320
Physical Hazards	320
Fire	320
Electricity	325
Radiation	326
Lifting and Moving	328
Slips, Trips, and Falls	330
Head Injury	331
Chemical Hazards	332
Formaldehyde	332
Gluteraldehyde	332
Methyl Methacrylate	332
Surgical Smoke	334
Latex Considerations	334
Exposure Control Plan and Personal Protective Equipment	334
Safety Compliance	336
Appendix: Answers to Post-Test Questions	345
Glossary	351
Index	361
