# ■ Contents

*Preface* | 17

## **PART I Introduction | 21**

### **CHAPTER 1 Understanding Scientific Research | 21**

Introduction | 22

Methods of Acquiring Knowledge | 23

Intuition | 23

Authority | 24

Rationalism | 24

Empiricism | 25

Science | 26

Induction and Deduction | 26

Hypothesis Testing | 27

Naturalism | 28

*Kuhn and Paradigms* | 29 ■ *Feyerabend's Anarchistic Theory of Science* | 29

What Exactly Is Science? | 30

Basic Assumptions Underlying Scientific Research | 31

Uniformity or Regularity in Nature | 31

Reality in Nature | 31

Discoverability | 32

Characteristics of Scientific Research | 32

Control | 32

Operationalism | 33

Replication | 34

The Role of Theory in Scientific Research | 35

The Role of the Scientist in Psychological Research | 36

Curiosity | 36

Patience | 37

Objectivity | 37

Change | 37

Objectives of Psychological Research | 38  
    Description | 38  
    Explanation | 38  
    Prediction | 39  
    Control or Influence | 39

Pseudoscience | 40  
    *Summary* | 40  
    *Key Terms and Concepts* | 42  
    *Related Internet Sites* | 42  
    *Practice Test* | 42  
    *Challenge Exercises* | 43

## CHAPTER 2 Research Approaches and Data Collection Methods | 45

Introduction | 46  
Variables in Quantitative Research | 47  
Experimental Research | 49  
Causation | 50  
    Cause | 50  
    Effect | 50  
    Required Conditions for Making the Claim of Causation | 51  
The Psychological Experiment | 52  
    1. *Objective Observation* | 52 ■ 2. *Of Phenomena That Are Made to Occur* | 52 ■ 3. *In a Strictly Controlled Situation in Which One or More Factors Are Varied and the Others Are Kept Constant* | 53  
Example of an Experiment and Its Logic | 53  
Advantages of the Experimental Approach | 55  
    1. *Causal Inference* | 55 ■ 2. *Ability to Manipulate Variables* | 56 ■ 3. *Control* | 56  
Disadvantages of the Experimental Approach | 56  
    1. *Does Not Test Effects of Nonmanipulated Variables* | 56 ■ 2. *Artificiality* | 57 ■  
    3. *Inadequate Method of Scientific Inquiry* | 57  
Experimental Research Settings | 57  
    Field Experiments | 57  
    Laboratory Experiments | 59  
    Internet Experiments | 59  
Nonexperimental Quantitative Research | 60  
    Correlational Study | 61  
    Natural Manipulation Research | 64  
    Cross-Sectional and Longitudinal Studies | 66  
Qualitative Research | 68  
Major Methods of Data Collection | 70  
    Tests | 70  
    Questionnaires | 71  
    Interviews | 72  
    Focus Groups | 73

Observation	74
Existing or Secondary Data	75
<i>Summary</i>	78
<i>Key Terms and Concepts</i>	79
<i>Related Internet Sites</i>	80
<i>Practice Test</i>	80
<i>Challenge Exercises</i>	81

## **PART II Planning the Research Study | 83**

### **CHAPTER 3 From Research Ideas to Hypothesis Formulation | 83**

Introduction	83
Sources of Research Ideas	84
Everyday Life	84
Practical Issues	85
Past Research	85
Theory	85
Bias in Research Ideas	87
Ideas Not Capable of Scientific Investigation	87
Review of the Literature	88
Getting Started	89
Defining Objectives	89
Doing the Search	89
Books	89 ■ Psychological Journals   90 ■ Computerized or Electronic Databases   90 ■ Internet Resources   93
Obtaining Resources	98
Additional Information Sources	98
Feasibility of the Study	99
Formulating the Research Problem	100
Defining the Research Problem	100
Specificity of the Research Question	101
Formulating Hypotheses	102
<i>Summary</i>	104
<i>Key Terms and Concepts</i>	105
<i>Related Internet Sites</i>	105
<i>Practice Test</i>	105
<i>Challenge Exercises</i>	106

### **CHAPTER 4 Ethics in Scientific Research | 108**

Introduction	109
Research Ethics: What Are They?	109
Relationship Between Society and Science	109
Professional Issues	110
Treatment of Research Participants	113

Ethical Dilemmas	113
Ethical Guidelines	118
Beneficence and Nonmaleficence	120
Fidelity and Responsibility	122
Integrity	122
Justice	123
Respect for People's Rights and Dignity	123
APA Ethical Standards for Research	124
Ethical Issues to Consider When Conducting Research	124
Institutional Approval	124
Informed Consent	125
<i>Dispensing With Informed Consent</i>	125 ■ <i>Informed Consent and Minors</i>
127 ■ <i>Passive Versus Active Consent</i>	127
Deception	129
Debriefing	131
Coercion and Freedom to Decline Participation	133
Confidentiality, Anonymity, and the Concept of Privacy	134
Ethical Issues in Electronic Research	136
Informed Consent and Internet Research	136
Privacy and Internet Research	137
Debriefing and Internet Research	138
Ethical Issues in Preparing the Research Report	138
Authorship	139
Writing the Research Report	139
Ethics of Animal (Nonhuman) Research	140
Safeguards in the Use of Animals	140
Animal Research Guidelines	141
I. Justification of the Research	141
II. Personnel	142
III. Care and Housing of Animals	142
IV. Acquisition of Animals	142
V. Experimental Procedures	143
VI. Field Research	144
VII. Educational Use of Animals	144
<i>Summary</i>	144
<i>Key Terms and Concepts</i>	146
<i>Related Internet Sites</i>	147
<i>Practice Test</i>	147
<i>Challenge Exercises</i>	148

## **PART III Foundations of Research | 151**

### **CHAPTER 5 Measurement Techniques and Sampling Methods | 151**

Introduction	152
Defining Measurement	152

Scales of Measurement   152
Nominal Scale   153
Ordinal Scale   153
Interval Scale   153
Ratio Scale   154
Psychometric Properties of Good Measurement   154
Overview of Reliability and Validity   154
Reliability   155
<i>Test-Retest Reliability</i>   155 ■ <i>Equivalent-Forms Reliability</i>   155 ■ <i>Internal Consistency Reliability</i>   155 ■ <i>Interrater Reliability</i>   156
Validity   156
<i>Validity Evidence Based on Content</i>   158 ■ <i>Validity Evidence Based on Internal Structure</i>   158 ■ <i>Validity Evidence Based on Relations to Other Variables</i>   159
Using Reliability and Validity Information   160
Sources of Information About Tests   161
Sampling Methods   161
Terminology Used in Sampling   161
Random Sampling Techniques   164
Simple Random Sampling   165
Stratified Random Sampling   166
Cluster Random Sampling   169
Systematic Sampling   169
Nonrandom Sampling Techniques   170
Random Selection and Random Assignment   171
Determining the Sample Size When Random Sampling Is Used   172
Sampling in Qualitative Research   173
<i>Summary</i>   174
<i>Key Terms and Concepts</i>   175
<i>Related Internet Sites</i>   176
<i>Practice Test</i>   176
<i>Challenge Exercises</i>   177

## CHAPTER 6 Ensuring Research Validity | 178

Introduction   179
Overview of Four Major Types of Validity   179
Statistical Conclusion Validity   180
Construct Validity   180
Threats to Construct Validity   181
<i>Participant Reactivity to the Experimental Situation</i>   181 ■
<i>Experimenter Effects</i>   184
Internal Validity   186
Threats to Internal Validity   187
<i>History</i>   188 ■ <i>Maturation</i>   190 ■ <i>Instrumentation</i>   191 ■ <i>Testing</i>   191 ■
<i>Regression Artifact</i>   192 ■ <i>Attrition</i>   193 ■ <i>Selection</i>   194 ■ <i>Additive and Interactive Effects</i>   194

External Validity   195
Population Validity   196
Ecological Validity   198
Temporal Validity   198
Treatment Variation Validity   199
Outcome Validity   199
Relationship between Internal and External Validity   200
<i>Summary</i>   201
<i>Key Terms and Concepts</i>   201
<i>Related Internet Sites</i>   202
<i>Practice Test</i>   202
<i>Challenge Exercises</i>   203

## **PART IV Experimental Methods | 207**

### **CHAPTER 7 Control Techniques in Experimental Research | 207**

Introduction   208
Control Techniques Carried Out at the Beginning of the Experiment
Randomization   209
Matching   215
Matching by Holding Variables Constant   215
Matching by Building the Extraneous Variable into the Research Design   215
Matching by Yoked Control   217
Matching by Equating Participants   218
Control Techniques Carried Out During the Experiment   220
Counterbalancing   220
Randomized Counterbalancing   222
Intrasubject Counterbalancing   223
Complete Counterbalancing   224
Incomplete Counterbalancing   225
Control of Participant Effects   227
Double-Blind Placebo Method   227
Deception   228
Control of Participant Interpretation   228
Control of Experimenter Effects   230
Control of Recording Errors   230
Control of Experimenter Attribute Errors   230
Control of Experimenter Expectancy Error   232
<i>The Blind Technique</i>   232 ■ <i>The Partial Blind</i>
<i>Technique</i>   233 ■ <i>Automation</i>   233
Likelihood of Achieving Control   233
<i>Summary</i>   234
<i>Key Terms and Concepts</i>   234
<i>Related Internet Sites</i>   235

*Practice Test* | 235

*Challenge Exercises* | 236

## **CHAPTER 8** **Creating the Appropriate Research Design** | 237

Introduction | 238

Weak Experimental Research Designs | 238

    One-Group Posttest-Only Design | 239

    One-Group Pretest–Posttest Design | 240

    Posttest-Only Design with Nonequivalent Groups | 241

Strong Experimental Research Designs | 242

Between-Participants Designs | 245

    Posttest-Only Control-Group Design | 245

    Strengths and Weaknesses of the Posttest-Only Control-Group Design | 247

Within-Participants Designs | 248

    Strengths and Weaknesses of Within-Participants Designs | 249

Mixed Designs (i.e., Combination of Between and Within) | 250

    Pretest–Posttest Control-Group Design | 251

    Advantages and Disadvantages of Including a Pretest | 252

Factorial Designs | 254

Factorial Designs Based on within-subjects independent variables | 260

Factorial Designs Based on a Mixed Model | 261

Strengths and Weaknesses of Factorial Designs | 262

How To Choose or Construct the Appropriate Experimental Design | 263

*Summary* | 264

*Key Terms and Concepts* | 266

*Related Internet Sites* | 266

*Practice Test* | 266

*Challenge Exercises* | 267

## **CHAPTER 9** **Procedure for Conducting an Experiment** | 269

Introduction | 270

Institutional Approval | 270

Research Participants | 271

    Obtaining Animals (Rats) | 272

    Obtaining Human Participants | 272

Sample Size | 274

    Power | 275

Apparatus and/or Instruments | 277

Procedure | 279

Scheduling of Research Participants | 279

Consent to Participate | 280

Instructions | 281

Data Collection | 282

- Debriefing, or Postexperimental Interview | 282
  - Debriefing Functions | 282
  - How to Debrief | 283
- Pilot Study | 285
  - Summary | 286
  - Key Terms and Concepts | 286
  - Related Internet Site | 287
  - Practice Test | 287
  - Challenge Exercise | 288

## CHAPTER 10 Creating a Quasi-Experimental Design | 289

- Introduction | 290
- Nonequivalent Comparison Group Design | 292
  - Outcomes with Rival Hypotheses | 295
    - Outcome I: Increasing Control and Experimental Groups | 295 ■ Outcome II: Experimental-Group-Higher-than-Control-Group-at-Pretest Effect | 296 ■ Outcome III: Experimental-Group-Lower-than-Control-Group-at-Pretest Effect | 297 ■ Outcome IV: Crossover Effect | 297
  - Ruling out Threats to the Nonequivalent Comparison Group Design | 298
  - Causal Inference from the Nonequivalent Comparison Group Design | 300
- Time-Series Design | 301
  - Interrupted Time-Series Design | 301
- Regression Discontinuity Design | 303
  - Summary | 306
  - Key Terms and Concepts | 307
  - Related Internet Sites | 307
  - Practice Test | 308
  - Challenge Exercises | 308

## CHAPTER 11 Creating a Single-Case Design | 311

- Introduction | 311
  - History of Single-Case Designs | 312
- Single-Case Designs | 314
  - ABA and ABAB Designs | 315
  - Interaction Design | 318
  - Multiple-Baseline Design | 319
  - Changing-Criterion Design | 322
- Methodological Considerations in Using Single-Case Designs | 324
  - Baseline | 324
  - Changing One Variable at a Time | 325
  - Length of Phases | 326

Criteria for Evaluating Change   327
Experimental Criterion   327
Therapeutic Criterion   327
Rival Hypotheses   329
<i>Summary</i>   329
<i>Key Terms and Concepts</i>   331
<i>Related Internet Sites</i>   331
<i>Practice Test</i>   331
<i>Challenge Exercises</i>   332

## **PART V Survey, Qualitative, and Mixed Methods Research | 333**

### **CHAPTER 12 The Survey as Non-Experimental Research | 333**

Introduction   334
When Should One Conduct Survey Research?   336
Steps in Survey Research   338
Cross-sectional and Longitudinal Designs   338
Selecting a Survey Data Collection Method   340
Constructing and Refining a Survey Instrument   343
Principle 1. Write Items to Match the Research Objectives   344
Principle 2. Write Items That Are Appropriate for the Respondents to be Surveyed   344
Principle 3. Write Short, Simple Questions   344
Principle 4. Avoid Loaded or Leading Questions   344
Principle 5. Avoid Double-Barreled Questions   345
Principle 6. Avoid Double Negatives   346
Principle 7. Determine whether Closed-Ended and/or Open-Ended Questions Are Needed   346
Principle 8. Construct Mutually Exclusive and Exhaustive Response Categories for Closed-Ended Questions   347
Principle 9. Consider the Different Types of Closed-Ended Response Categories Rating Scales   348
<i>Binary Forced Choice</i>   350 ■ <i>Rankings</i>   350 ■ <i>Checklists</i>   351
Principle 10. Use Multiple Items to Measure Complex or Abstract Constructs   351
<i>Semantic Differential</i>   351 ■ <i>Likert Scaling</i>   352
Principle 11. Make Sure the Questionnaire Is Easy to Use From the Beginning to the End   353
<i>Ordering of Questions</i>   353 ■ <i>Contingency Questions</i>   354 ■ <i>Questionnaire         Length</i>   355 ■ <i>Response Bias</i>   355
Principle 12. Pilot Test the Questionnaire Until It Is Perfected   356
Selecting Your Survey Sample From the Population   356
Preparing and Analyzing Your Survey Data   358

*Summary* | 359  
*Key Terms and Concepts* | 359  
*Related Internet Sites* | 360  
*Practice Test* | 360  
*Challenge Exercises* | 361

## **CHAPTER 13 Qualitative and Mixed Methods Research | 362**

Introduction | 363  
 Major Characteristics of Qualitative Research | 364  
 Research Validity in Qualitative Research | 364  
     *Descriptive Validity* | 366 ■ *Interpretive Validity* | 367 ■ *Theoretical Validity* | 367 ■ *Internal Validity* | 368 ■ *External Validity* | 369  
 Four Major Qualitative Research Methods | 369  
 Phenomenology | 370  
     *Phenomenological Data Collection and Data Analysis* | 370 ■ *Phenomenological Report Writing* | 371  
 Ethnography | 372  
     *Ethnographic Data Collection Methods* | 373 ■ *Entry, Group Acceptance, and Fieldwork* | 374 ■ *Data Analysis and Report Writing* | 376  
 Case Study Research | 377  
     *Data Collection in Case Study Research* | 377 ■ *Case Study Designs* | 377 ■ *Case Study Data Analysis and Report Writing* | 379  
 Grounded Theory | 379  
     *Data Collection in Grounded Theory Research* | 381 ■ *Grounded Theory Data Analysis and Report Writing* | 381  
 Mixed Methods Research | 382  
 Research Validity In Mixed Methods Research | 384  
 Mixed Methods Designs | 385  
     *Summary* | 388  
     *Key Terms and Concepts* | 389  
     *Related Internet Sites* | 390  
     *Practice Test* | 390  
     *Challenge Exercises* | 391

## **PART VI Analyzing and Interpreting Data | 393**

### **CHAPTER 14 Summarizing Research Data-Descriptive Statistics | 393**

Introduction | 394  
 Descriptive Statistics | 394  
 Frequency Distributions | 397  
 Graphic Representations of Data | 397  
     Bar Graphs | 398  
     Histograms | 398

Line Graphs	399
Scatterplots	401
Measures of Central Tendency	403
Mode	404
Median	404
Mean	404
Measures of Variability	405
Range	406
Variance and Standard Deviation	406
<i>Standard Deviation and the Normal Curve</i>	408 ■ <i>Z-scores</i>   408
Examining Relationships Among Variables	410
Unstandardized and Standardized Difference Between Group Means	410
Correlation Coefficient	413
<i>Partial Correlation Coefficient</i>	417
Regression Analysis	418
Contingency Tables	422
<i>Summary</i>	424
<i>Key Terms and Concepts</i>	424
<i>Related Internet Sites</i>	425
<i>Practice Test</i>	425
<i>Challenge Exercises</i>	426

## CHAPTER 15 Using Inferential Statistics | 427

Introduction	428
Sampling Distributions	429
Estimation	431
Hypothesis Testing	433
Directional Alternative Hypotheses	439
Review of the Logic of Hypothesis Testing	440
Hypothesis-Testing Errors	441
Hypothesis Testing in Practice	443
The <i>t</i> Test for Correlation Coefficients	443
One-Way Analysis of Variance	445
Post Hoc Tests in Analysis of Variance	446
Analysis of Covariance	448
Two-Way Analysis of Variance	450
One-Way Repeated Measures Analysis of Variance	453
The <i>t</i> Test for Regression Coefficients	455
Chi-Square Test for Contingency Tables	458
Other Significance Tests	459
Hypothesis Testing and Research Design	459
<i>Summary</i>	462
<i>Key Terms and Concepts</i>	463
<i>Related Internet Sites</i>	463

*Practice Test* | 464  
*Challenge Exercises* | 465

## **PART VII Writing the Research Report | 467**

### **CHAPTER 16 Preparing and Publishing the Research Report | 467**

Introduction | 468  
The APA Format | 470  
Preparation of the Research Report | 480  
    Writing Style | 480  
    Language | 482  
        *Specificity* | 482 ■ *Labels* | 482 ■ *Participation* | 482 ■ *Specific Issues* | 482  
    Editorial Style | 483  
        *Italics* | 484 ■ *Abbreviations* | 484 ■ *Headings* | 484 ■ *Quotations* | 485 ■  
        *Numbers* | 485 ■ *Physical Measurements* | 485 ■ *Presentation of Statistical*  
        *Results* | 485 ■ *Tables* | 485 ■ *Figures* | 487 ■ *Figure Legends and*  
        *Caption* | 487 ■ *Figure Preparation* | 487 ■ *Reference*  
        *Citations* | 488 ■ *Reference List* | 489 ■ *Preparation of the Manuscript*  
        *for Submission* | 491 ■ *Ordering of Manuscript Pages* | 491  
Submission of the Research Report for Publication | 491  
    Acceptance of the Manuscript | 493  
Presenting Research Results at Professional Conferences | 493  
    Oral Presentation | 494  
    Poster Presentation | 494  
    *Summary* | 496  
    *Key Terms and Concepts* | 497  
    *Related Internet Sites* | 497  
    *Practice Test* | 498  
    *Challenge Exercises* | 498

*Appendix* | 499  
*Glossary* | 500  
*References* | 515  
*Index* | 527
