

PEARSON NEW INTERNATIONAL EDITION

Human Biology
Concepts and Current Issues
Michael D. Johnson
Seventh Edition

10045654

ห้องสมุด วพบ. สุรินทร์

Table of Contents

1. Human Biology, Science, and Society Michael D. Johnson	1
2. The Chemistry of Living Things Michael D. Johnson	25
3. Structure and Function of Cells Michael D. Johnson	55
4. From Cells to Organ Systems Michael D. Johnson	89
5. The Skeletal System Michael D. Johnson	115
6. The Muscular System Michael D. Johnson	139
7. Blood Michael D. Johnson	163
8. Heart and Blood Vessels Michael D. Johnson	187
9. The Respiratory System: Exchange of Gases Michael D. Johnson	219
10. The Immune System and Mechanisms of Defense Michael D. Johnson	247
11. The Nervous System: Integration and Control Michael D. Johnson	283
12. Sensory Mechanisms Michael D. Johnson	319
13. The Endocrine System Michael D. Johnson	347

14. The Digestive System and Nutrition Michael D. Johnson	375
15. The Urinary System Michael D. Johnson	409
16. Reproductive Systems Michael D. Johnson	435
17. Cell Reproduction and Differentiation Michael D. Johnson	465
18. Cancer: Uncontrolled Cell Division and Differentiation Michael D. Johnson	489
19. Genetics and Inheritance Michael D. Johnson	511
20. DNA Technology and Genetic Engineering Michael D. Johnson	537
21. Development and Aging Michael D. Johnson	555
22. Evolution and the Origins of Life Michael D. Johnson	583
23. Ecosystems and Populations Michael D. Johnson	605
24. Human Impacts, Biodiversity, and Environmental Issues Michael D. Johnson	627
Index	647
