23 Older Adults' Perceptions of Their Fall Risk and Prevention Strategies After Transitioning from Hospital to Home

Perceptions of older adults during the transition period from hospital to home, including sedentary behavior, lack of engagement in fall prevention, low fall risk perception, and misguided fall prevention efforts, indicate the need for transitional fall prevention programs.

39 Burden and Coping Ability of Individuals Caring for Chronically Ill Older Adults in Nigeria: A Mixed Methods Study

Caregivers in Sub-Sahara Africa were found to have severe burden, moderate coping ability, and reduced quality of life, as many services that provide support for older adults, such as nursing homes, home nursing, and social security, are virtually nonexistent in Nigeria.
