## Diabetes care

Journal of Gerontological Nursing	1,970.00 บาท
-----------------------------------	--------------

### Assessing patients' informal and formal knowledge

Influence of personality traits on older adults' subjective cognitive impairment

Kaimai-style Qigong exercise using a gaming platform

Core concepts of person-centered care in long-term services and supports

Evidence-Based Practice Guideline

Prompted voiding for urinary incontinence

## FEATURE ARTICLES

- 27 Relationships Between Subjective Cognitive Impairment and Personality Traits: A Systematic Review**  
The current study supports the known association between higher neuroticism and greater self-reports of cognitive problems; however, the complex relationship between subjective cognitive impairment and personality traits requires further study.

*Oliva M. Koller, BSN, RN; Nikki L. Hill, PhD, RN; Jacqueline Mogle, PhD; and Iris Bhang, BScN, RN*

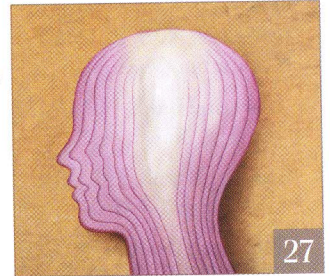

- 35 Assessing Informal and Formal Diabetes Knowledge in African American Older Adults With Uncontrolled Diabetes**

Nurses should provide individualized diabetes education based on patients' experiential understanding of the disease.

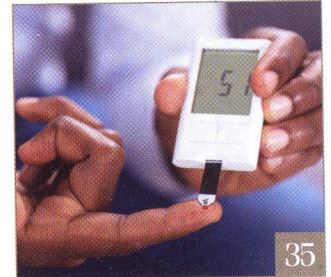

*Kia Skrine Jeffers, PhD, RN, PHN; Mary Cadogan, DrPH, GNP-BC, FAAN, FGSA; MarySue V. Heilemann, PhD, RN, FAAN; and Linda R. Phillips, PhD, RN, FGSA*

- 42 Effect of Low-Intensity, Kinect™-Based Kaimai-Style Qigong Exercise in Older Adults With Type 2 Diabetes**  
Using a computer game platform to exercise, older adults with type 2 diabetes had reduced glycated hemoglobin and improved balance and cognitive function at the end of the 12-week intervention.

*Hong Cai, MD; Guichen Li, MD; Shengqian Jiang, MD; Huiru Yin, PhD; Peng Liu, PhD; and Li Chen, PhD*
