EDITORIAL

339 Nursing, Nurses, and Ethics

A historical view of ethics in nursing practice during this Year of Ethics as designated by the American Nurses Association.

Nancy K. Lowe

EXPERT OPINION

341 Transforming Communication and Safety Culture in Intrapartum Care: A Multi-Organization Blueprint

Multi-organization blueprint for labor and delivery safety, developed by four leading professional organizations in maternal health, calls for improving communication among all members of the health care team to ensure fewer risks and better outcomes for mothers and infants.

Audrey Lyndon, M. Christina Johnson, Debra Bingham, Peter G. Napolitano, Gerald Joseph, David G. Maxfield, and Daniel F. O'Keefe

REVIEW

350 A Systematic Review of the Relationship Between Postpartum Sleep Disturbance and Postpartum Depression

In this review of 13 observational studies, the authors suggest that a strong relationship exists between postpartum sleep disturbance and symptoms of depression.

Sue Bhatti and Kathy Richards

RESEARCH

358 Perinatal Experiences of Somali Couples in the United States

These findings demonstrate the challenges of navigating the conflicting values, beliefs, understandings, and expectations of immigrant Somali couples within the U.S. health care system during pregnancy and childbirth.

Danuta M. Wojnar

370 The Early Postpartum Experience of Previously Infertile Mothers

During the early postpartum period, previously infertile mothers described their lingering identities as infertile and their gratitude for the gift of motherhood.

Sigrid Ladores and Karen Aroian

380 Self-Report of Eating Disorder Symptoms Among Women With and Without Infertility

Women seeking treatment for infertility had significantly greater scores on measures of drive for thinness and bulimic symptoms.

Ann Cousins, Melissa Freizinger, Mary E. Duffy, Matthew Gregas, and Barbara E. Wolfe

389 Expectations of Pregnant Women of Mexican Origin Regarding Their Health Care Providers

These women wanted their providers to provide them with "everything," to be direct, to speak their language, and to be friendly.

Susan M. Baxley and Kristina Ibitayo

CASE REPORT

397 An Innovative Nursing Approach to Caring for an Obstetric Patient With Rape Trauma Syndrome

This case report illustrates creative nursing care to help a woman participate actively in her own physical care and decrease additional psychological trauma.

IN FOCUS EDITORIAL

409 Using Evidence on Human Milk and Breastfeeding to Transform Care

The guest editor introduces the articles in the series that present the most current evidence related to human milk and breastfeeding.

Diane L. Spatz

IN FOCUS

412 Improving Practice at the Point of Care Through the Optimization of the Breastfeeding Resource Nurse Model

Implementation of the Breastfeeding Resource model resulted in positive outcomes for staff; the course is transferrable to other facilities worldwide.

Diane L. Spatz, Elizabeth B. Froh, Regina Flynn-Roth, and Sharon Barton

419 The Voices of Breastfeeding Resource Nurses

The breastfeeding resource nurse serves as patient advocate and educator for staff and families.

Elizabeth B. Froh, Regina Flynn-Roth, Sharon Barton, and Diane L. Spatz

IN FOCUS CNE

426 Improving Human Milk and Breastfeeding Practices in the NICU

CNE

The authors implemented the Spatz 10 Step Method for Promoting and Protecting Breastfeeding in Vulnerable Populations on their unit, which increased breastfeeding rates at discharge threefold.

Karen Fugate, Ivonne Hernandez, Terri Ashmeade, Branko Miladinovic, and Diane L. Spatz

IN FOCUS

439 Making Meaning of Pumping for Mothers of Infants With Congenital Diaphragmatic Hernia

Findings reflected the importance of human milk oral care as a driving factor to motivate mothers to maintain milk supply during their infants' hospitalizations for congenital diaphragmatic hernia.

Elizabeth B. Froh, Janet A. Deatrick, Martha A. Q. Curley, and Diane L. Spatz

450 Postdischarge Breastfeeding Outcomes of Infants With Complex Anomalies That Require Surgery

A strong culture in support of human milk and breastfeeding can improve breastfeeding outcomes for mothers of infants with complex anomalies that require surgery.

Kimberly Martino, Meg Wagner, Elizabeth B. Froh, Alexandra L. Hanlon, and Diane L. Spatz
