REVIEW

An Integrative Review of Factors that Influence Breastfeeding Duration for Premature Infants after NICU Hospitalization

Findings were categorized into the themes of NICU factors, feeding and soothing methods, maternal characteristics, maternal experiences, and support systems.

Carrie-Ellen Briere, Jacqueline McGrath, Xiaomei Cong, and Regina Cusson

RESEARCH

A Quasi-experimental Outcomes Analysis of a Psychoeducation Intervention for Pregnant Women with Abuse-related Posttraumatic Stress

Pregnant women with a history of childhood maltreatment in the intervention group had improved scores on all intrapartum and postpartum psychological outcomes.

Heather Rowe, Mickey Sperlich, Heather Cameron, and Julia Seng

294 Feasibility of Oral Prenatal Probiotics against Maternal Group B *Streptococcus* Vaginal and Rectal Colonization

In this quasi-experimental study, participants in the probiotic group had lower quantitative GBS colony counts.

Lisa Hanson, Leona VandeVusse, Megan Duster, Simone Warrack, and Nasia Safdar

305 Korean Immigrant Women's Lived Experience of Childbirth in the United States

These qualitative data revealed the multifaceted barriers faced by the participants during pregnancy and childbirth in an unfamiliar sociocultural context.

Jin Young Seo, Wooksoo Kim, and Suzanne S. Dickerson

318 Experiences of Mothers of Infants with Neonatal Abstinence Syndrome in the Neonatal Intensive Care Unit

Themes of understanding addiction, watching the infant withdraw, judging, and trusting the nurses were identified from interviews with 15 Hispanic mothers.

Lisa M. Cleveland and Rebecca Bonugli

330 Non-nutritive Sucking for Preterm Infants in Egypt

In this experimental study, infants in the non-nutritive sucking group had higher oxygen saturation during and after nasogastric feeding.

Heba Kamhawy, Diane Holditch-Davis, Sabah Alsharkawy, Safy Alrafay, and Kirsten Corazzini

341 The Effect of Maternal Presence on Premature Infant Response to Recorded Music

There was no infant response to music with or without mothers' presence.

Trish Dearn and Helen Shoemark

351 Cohort Efficacy Study of Natural Family Planning among Perimenopause Age Women

This secondary analysis suggested that, with correct use and adequate instructions, natural family planning can be effective for older women to avoid an unintended pregnancy.

Richard J. Fehring and Qiyan Mu
