EDITORIAL

Useful Resources for JOGNN Authors

New case study guidelines and the CONSORT-OB standards have been added to the journal's author resources.

Nancy K. Lowe

RESEARCH

Contributions of Clinical Disconnections and Unresolved Conflict to Failures in Intrapartum Safety

A national survey of nurses, physicians, and midwives indicates that patients are put at risk due to team members' failure to listen or respond to safety concerns.

Audrey Lyndon, Marya G. Zlatnik, David G. Maxfield, Annie Lewis, Chase McMillan, and Holly Powell Kennedy

Standardizing the Words Nurses Use to Document Elements of Perinatal Failure to Rescue

An expert nurse panel identified 76 distinct documentation elements related to careful monitoring, timely identification of problems, appropriate intervention, and activation of a team response.

Catherine H. Ivory

Pregnancy with Chronic Illness

These qualitative findings suggest that pregnancy may alter chronic illness, increase stress, and create new health care needs for women with chronic illness.

Lynda A. Tyer-Viola and Ruth Palan Lopez

38 The Lived Experience of Fathers Whose Children Are Diagnosed with a Genetic Disorder

Fathers described deficient education and information primarily due to knowledge deficits among physicians, nurses, and other health care professionals about their children's genetic disorders.

Mary T. Rivard and Beth Mastel-Smith

50 Experiences of Preconception, Pregnancy, and New Motherhood for Lesbian Nonbiological Mothers

The authors of this qualitative analysis describe seven themes that illustrate these women's experiences of *feeling different*.

Danuta M. Wojnar and Amy Katzenmeyer

61 Women's Reasons for Attrition from a Nurse Home Visiting Program

These data suggest that women's retention in the Nurse-Family Partnership program may be improved by reframing program relevance to individual mothers' needs.

Margaret L. Holland, Julie J. Christensen, Laura P. Shane, Margaret H. Kearney, and Harriet J. Kitzman

PRINCIPLES & PRACTICE

71 An Evidence-Based Approach to Breastfeeding Neonates at Risk for Hypoglycemia

Implementation of the new guidelines supported infant safety, glucose stabilization, breastfeeding within the first hour of life, and breastfeeding frequency.

Georgia Lowmaster Csont, Susan Groth, Patrick Hopkins, and Ronnie Guillet
