IN FOCUS: OBESITY AND WOMEN'S HEALTH

IN FOCUS EDITORIAL

758 Obesity and Women's Health

The guest editor introduces the articles in this series that address the relationship between overweight and obesity and women's health.

Kathie Records

IN FOCUS

760 Exploring the Psychosocial Predictors of Gestational Diabetes and Birth Weight

Cumulative stress was a predictor of birth weight, so providers should screen for and assist women with stressors to positively affect birth weight.

Barbara L. Wilson, Jane M. Dyer, Gwen Latendresse, Bob Wong, and Laurie Baksh

IN FOCUS CNE

772 Effect of Maternal Body Mass Index on Infant Breastfeeding Behaviors and Exclusive Direct Breastfeeding

CNE

Each mother with an elevated body mass index should be given a discharge plan to maintain milk supply, pumping, frequent feeding, and infant weight checks.

Ruth Lucas, Michelle Judge, Joanna Sajdlowska, Xiaomei Cong, Jacqueline M. McGrath, and Debra Brandon

IN FOCUS

784 Women's Perceptions Regarding Obesity and Comorbidities and Provider Interaction

In this study, the majority of participants incorrectly identified their BMI categories, which suggests the need for counseling and patient education efforts by health care providers.

Jennifer Goldkamp, Sara Anderson, Yulia Lifits-Podorozhansky, and Jeffrey A. Gavard

793 Implications for Policy to Support Healthy Weight for Women

The author reviews the global and national prevalence of and outcomes for obesity in women, including significant health disparities that are associated with childbearing.

Sue Kendig
