## EDITORIAL

### 1 How to Submit a Publishable Manuscript

The JOGNN editor provides tips for writers.

*Nancy K. Lowe*

## RESEARCH

### 3 Behavioral and Psychosocial Health of New Mothers and Associations With Contextual Factors and Perceived Health

In this ethnically and economically diverse sample of postpartum women, perceived stress and social support were significantly associated with their behavioral and psychosocial health.

*Lorraine O. Walker, Bo Xie, Sherry G. Hendrickson, and Bobbie S. Sterling*

### 17 Experiences of Nurses Who Care for Women After Fetal Loss

All participants demonstrated all of Swanson's caring processes but used them preferentially according to situational exigencies and level of rapport with the woman.

*Marianne H. Hutt, Barbara Polivka, Susan White, Janice Hill, Paul Clark, Cathy Cooke, Savannah Clemens, and Hayley Abell*

### 28 Exploring Fear of Childbirth in the United States Through a Qualitative Assessment of the Wijma Delivery Expectancy Questionnaire

The findings of this study support revision of the Wijma Delivery Expectancy Questionnaire to make it a useful screening tool to identify fear of childbirth in women in the United States.

*Lee Roosevelt and Lisa Kane Low*

### 39 Timing of Newborn Pulse Oximetry Screenings for Critical Congenital Heart Defects Before Discharge

Findings supported the state mandate of one pulse oximetry screening completed within 24 to 48 hours of birth.

*Lynn Crouch, Karen Gabel Speroni, Ruth Ann Jones, Eileen P. MacDougall, and Marlon G. Daniel*

### 45 A Test of Kangaroo Care on Preterm Infant Breastfeeding

The authors found that assignment to any of the three groups (kangaroo care, auditory-tactile-visual-vestibular intervention, or preterm infant care information) did not influence breastfeeding outcomes.

*Kristin P. Tully, Diane Holditch-Davis, Rosemary C. White-Traut, Richard David, T. Michael O'Shea, and Victoria Geraldo*

### 62 Reactions of Low-Income African American Women to Breastfeeding Peer Counselors

Breastfeeding peer counselors are an underutilized resource that supports breastfeeding, particularly among African American women.

*Karen Robinson, Leona VandeVusse, and Jamarrah Foster*

### 71 Effectiveness of a Breastfeeding Intervention on Knowledge and Attitudes Among High School Students in Taiwan

Breastfeeding education in the school setting can be a successful strategy to encourage female adolescents to make healthy behavioral choices.

*Yen-Ju Ho and Jacqueline M. McGrath*

## PRINCIPLES & PRACTICE

### 78 Consumption of the Placenta in the Postpartum Period

Women's health care providers should be informed so they can advise women about the possible risks and benefits of consuming the placenta.

*Emily Hart Hayes*

## SPECIAL REPORT

### 90 Current Resources for Evidence-Based Practice, January/February 2016

A review of new resources to support the provision of evidence-based care for women and infants.

*Nicole S. Carlson*

**IN FOCUS EDITORIAL**

- 98 Advancing the Care of Individuals and Couples at Risk for and Diagnosed With Infertility**  
 The guest editors introduce the articles in the series, which address several hallmark nursing care activities in the modern infertility setting.  
*Patricia E. Hershberger and Eleanor L. Stevenson*

**IN FOCUS CNE**

- 100 Evidence-Based Care for Couples With Infertility**  
 When couples seek treatment for infertility, it is important for the health care provider to understand the etiology and evaluation of infertility, the various treatment options available, and the appropriate clinical implications.  
*Eleanor L. Stevenson, Patricia E. Hershberger, and Paul A. Bergh*

**IN FOCUS**

- 111 Evidence-Based Management of Infertility in Women With Polycystic Ovary Syndrome**  
 The authors discuss the importance of promoting early detection, education, and identification of services and resources to improve fertility and lifelong health for women with polycystic ovary syndrome.  
*Catherine M. Bergh, Monica Moore, and Carolyn Gundell*

- 123 Reasons Why Young Women Accept or Decline Fertility Preservation After Cancer Diagnosis**  
 The underlying reasons for young women's decisions about fertility preservation treatment were linked to an evolving theoretical framework about decision-making processes.  
*Patricia E. Hershberger, Heather Sipsma, Lorna Finnegan, and Jennifer Hirshfeld-Cytron*
