EDITORIAL

757 **The Nurse's Role in the Promotion of Safe Sleep for Infants**

The Associate Editor suggests that nurses model safe sleep practices from the newborn's initial sleep to reduce the incidence of sudden, unexplained infant death.

Marilyn Stringer

RESEARCH

760 **The Relationship Among Breastfeeding, Postpartum Depression, and Postpartum Weight in Mexican American Women**

Breastfeeding contributed to lower depression and lower weight postpartum in Mexican American women.

Elizabeth Reifsnider, Jenna Flowers, Michael Todd, Jennie Bever Babendure, and Michael Moramarco

772 **Anti-Müllerian Hormone Levels and Urinary Cortisol in Women With Chronic Abdominal Pain**

Chronic abdominal pain and hypothalamic-pituitary-adrenal dysregulation may be associated with abnormal anti-Müllerian hormone levels.

Theresa M. Hardy, Donna O. McCarthy, Nicolaas H. Fourie, and Wendy A. Henderson

781 **Perinatal Experiences of Women With Physical Disabilities and Their Recommendations for Clinicians**

Twenty-five women with physical disabilities identified problematic interactions with maternity care clinicians and provided several specific recommendations to improve perinatal care for women with physical disabilities.

Suzanne C. Smeltzer, Monika Mitra, Lisa I. Iezzoni, Linda Long-Bellil, and Lauren D. Smith

790 **North American Nurses' and Doulas' Views of Each Other**

Differing attitudes toward obstetric procedures and more experience working together influence nurses' and doulas' views of each other.

Louise Marie Roth, Megan M. Henley, Marla J. Seacrist, and Christine H. Morton

801 **Vicarious Posttraumatic Growth in Labor and Delivery Nurses**

Labor and delivery nurses who cared for women during traumatic births reported a moderate degree of vicarious posttraumatic growth due to their struggles with these challenging life events.

Cheryl Tatano Beck, Carrie Morgan Eaton, and Robert K. Gable

813 **Adherence to the Women's Preventive Services Guidelines in the Affordable Care Act**

Adherence to the Women's Preventive Services Guidelines by providers in New Mexico is less than optimal; tailored interventions to target barriers should be implemented.

Mindy B. Tinkle, Beth B. Tigges, Blake Boursaw, and Deborah R. McFarlane

825 **Breastfeeding Preterm Infants at a Neonatal Care Unit in Rural Tanzania**

Mothers perceived breastfeeding as natural but needed support to adapt to their new situations and feel confident to breastfeed their preterm infants.

Marita Hasselberg, Karina Huus, and Marie Golsäter

PRINCIPLES & PRACTICE

836 **A Concept Analysis on the Use of Yakson in the NICU**

Yakson, the practice of soothing touch from Korea, can be used in the NICU internationally because of its acceptability and feasibility.

Jungeun Kim

SPECIAL REPORT

845 Current Resources for Evidence-Based Practice, November/December 2016

A review of new resources to support the provision of evidence-based care for women and infants.

Nicole S. Carlson

IN FOCUS EDITORIAL

857 Nursing Strategies to Address Maternal Morbidity and Mortality

The Guest Editor introduces the articles in this series on maternal morbidity and mortality.

M. Cynthia Logsdon

IN FOCUS COMMENTARY

861 Expert Panel to Track Nurses' Effect on Maternal Morbidity and Mortality

All deaths and injuries should prompt thorough review to ensure that no woman who gives birth in the United States suffers a preventable injury or death and that no racial or ethnic group suffers from disproportionate outcomes.

Debra Bingham and Andria Cornell

IN FOCUS

865 Identifying Potentially Preventable Elements in Severe Adverse Maternal Events

The authors describe a nursing-specific tool to identify system-level factors for severe adverse maternal events not captured in the medical record.

Margaret-Rose Agostino, Barbara Wilson, and Renee Byfield

870 Development of a Tool to Measure Nurse Clinical Judgment During Maternal Mortality Case Review

New tools related to early warning signs, nurse responses, and documented time lapses can be used to evaluate nurse clinical judgement during chart review.

Marla J. Seacrist and Danielle Noell

878 How Communication Among Members of the Health Care Team Affects Maternal Morbidity and Mortality

The authors discuss strategies to promote effective communication to reduce severe maternal morbidity and mortality.

Rita Allen Brennan and Carol Ann Keohane

IN FOCUS CNE

885 Strategies to Reduce Maternal Mortality During the First Year After Birth

CNE

Education of patients, families, and health care providers about the signs and symptoms of pregnancy-related complications promises to reduce perinatal maternal mortality during the first year after pregnancy.

Robyn D'Oria, John Myers, and M. Cynthia Logsdon

IN FOCUS

894 Discharge Education on Maternal Morbidity and Mortality Provided by Nurses to Women in the Postpartum Period

During postpartum hospitalization, nurses did not consistently provide education to all women on the warning signs that can lead to maternal morbidity and mortality.

Patricia D. Suplee, Lisa Kleppel, and Debra Bingham
