EDITORIAL

323 **Racial Disparity in the Prevalence of Cervical Cancer**

Efforts are needed to eliminate the disproportionate mortality from cervical cancer shared by Black and other minority women in the United States.

Nancy K. Lowe

REVIEWS

325 **Review of the Relationships Among Psychosocial Stress, Secondhand Smoke, and Perinatal Smoking**

An increased incidence of persistent smoking or relapse during pregnancy was found in women with greater measures of stress and exposure to secondhand smoke.

Karen R. Damron

334 **Physical Activity and Yoga-Based Approaches for Pregnancy-Related Low Back and Pelvic Pain**

Although additional research is required, physical activity and yoga interventions may relieve pregnancy-related low back and pelvic pain and related symptoms.

Patricia Anne Kinser, Jena Pauli, Nancy Jallo, Mary Shall, Kailee Karst, Michelle Hoekstra, and Angela Starkweather

347 **Integrative Review of Interventions to Promote Breastfeeding in the Late Preterm Infant**

Most breastfeeding interventions in this review had positive effects on exclusivity and duration of breastfeeding in late preterm infants.

JoAnna Cartwright, Teresa Atz, Susan Newman, Martina Mueller, and Jill R. Demirci

357 **Integrative Review of Technology to Support Communication With Parents of Infants in the NICU**

Most parents and health care team members perceived the use of technology to support communication and interaction with the NICU team quite favorably.

Elizabeth G. Epstein, Jaqueline Arechiga, Margaret Dancy, Jordan Simon, Daniel Wilson, and Jeanne L. Alhusen

PRINCIPLES & PRACTICE

367 **Ethical Considerations in Perinatal Palliative Care**

Emerging perinatal palliative care topics are presented along with the ethical implications that may affect parents facing a life-limiting fetal condition and their providers.

Joana Mendes, Jesse Wool, and Charlotte Wool

378 **A Cycles-Breaking Framework to Disrupt Intergenerational Patterns of Maltreatment and Vulnerability During the Childbearing Year**

The proposed framework has the potential to disrupt intergenerational patterns of childhood maltreatment and psychiatric vulnerability during the childbearing year and to guide the delivery of perinatal care.

Mickey Sperlich, Julia Seng, Heather Rowe, Jane Fisher, Chris Cuthbert, and Julie Taylor

RESEARCH

390 **Intimate Partner Violence and Gestational Weight Gain in a Population-Based Sample of Perinatal Women**

Through a greater understanding of the relationship between intimate partner violence and gestational weight gain, interventions can be developed to promote maternal and child health.

Jeanne L. Alhusen, Ruth Geller, Caitlin Dreisbach, Leeza Constantoulakis, and Anna Maria Siega-Riz

403 **Retrospective Cohort Study of Hydrotherapy in Labor**

In an environment in which hydrotherapy for management of pain in labor was promoted, most women initiated hydrotherapy, and fewer than 30% were removed because they met medical exclusion criteria.

Jennifer Vanderlaan

411 **The Maternity Care Nurse Workforce in Rural U.S. Hospitals**

Rural maternity care unit managers value nurses and have varied staffing needs; policy and programmatic support to ameliorate challenges are needed to maintain adequate nurse staffing.

Carrie Henning-Smith, Jennifer Almanza, and Katy B. Kozhimannil

423 Cultural Competence of Obstetric and Neonatal Nurses

In obstetric and neonatal nurses, cultural competence was related to age, previous diversity training, nursing experience, and experience in the specialty area.

Ella T. Heitzler

434 Resilience in Mothers of Very-Low-Birth-Weight Infants Hospitalized in the NICU

Participants demonstrated resilience as they learned to cope with long-term psychological distress.

Beverly Rossman, Michelle M. Greene, Amanda L. Kratovil, and Paula P. Meier

446 Parent Distress and the Decision to Have Another Child After an Infant's Death in the NICU

Having another infant may promote resilience in parents bereaved by infant death; however, several factors contribute to the complex decision-making process regarding family expansion.

Madelaine C. Keim, Christine A. Fortney, Emily L. Shultz, Adrien Winning, Cynthia A. Gerhardt, and Amy Baughcum

456 Maternal Anxiety Related to Prenatal Diagnoses of Fetal Anomalies That Require Surgery

Women with pregnancies complicated by fetal anomalies that require surgery are highly anxious; this anxiety may be mitigated through knowledge of the nurse care coordinator.

Abigail B. Wilpers, Holly Powell Kennedy, Diane Wall, Marjorie Funk, and Mert Ozan Bahtiyar

465 Prevalence and Predictors of Breastfeeding After Childhood Abuse

For women with a history of childhood maltreatment trauma, posttraumatic stress disorder is more predictive of breastfeeding outcomes than history alone.

Meghan Eagen-Torkko, Lisa Kane Low, Ruth Zielinski, and Julia S. Seng

CASE REPORT

480 The Effect of Sexual Abuse and Prenatal Substance Use on Successful Breastfeeding

Providers should understand effects of sexual abuse and substance use/misuse on the mother and newborn independently and together to ensure successful breastfeeding.

Lauren M. Jansson, Martha L. Velez, and Arlene M. Butz

SPECIAL REPORT

e37 Current Resources for Evidence-Based Practice, May/June 2017

A review of new resources to support the provision of evidence-based care for women and infants.

Nicole S. Carlson

IN FOCUS EDITORIAL

e46 An Update on Global Women's Health

The Guest Editor introduces the articles in the series that focus on the health and well-being of women and girls worldwide.

Susan Mattson

IN FOCUS

e48 An Update on the United Nations Millennium Development Goals

The author discusses the measured accomplishments of the United Nations Millennium Development Goals at the time of their conclusion in 2015 and explores the new Sustainable Development Goals.

Della Anne Campbell

IN FOCUS CNE

e56 Sustainable Development Goals and the Ongoing Process of Reducing Maternal Mortality

CNE

The purpose of the Sustainable Development Goals is to build on and accelerate progress made toward ensuring healthy lives and promoting well-being for all at all ages.

Lynn Clark Callister and Joan E. Edwards

IN FOCUS

e65 Empowering the Girl Child, Improving Global Health

Helping girls achieve their full potential is key to building a healthy and productive global society.

Sandra K. Cesario and Barbara Moran

RESEARCH

e75 Reported Alcohol and Tobacco Use and Screening Among College Women

Despite high rates of alcohol and tobacco use on college campuses, rates of screening at campus health centers are low. Opportunities exist to increase population-specific health screenings.

Kimberly Angelini, Melissa A. Sutherland, and Heidi Collins Fantasia

e83 Nutrition of Black Women During Pregnancy

Given the stability and overall inadequacy of pregnant Black women's diets, nutritional counseling should be considered at any point in the second and third trimesters.

Melissa Myles, Susan Gennaro, Nancy Dubois, Caitlin O'Connor, and Kayla Roberts

e95 Insomnia Treatment Preferences During Pregnancy

Pregnant women find CBT-I to be more credible than pharmacotherapy and prefer it to other modalities as an intervention for insomnia.

Ivan D. Sedov, Sherryl H. Goodman, and Lianne M. Tomfohr-Madsen

e105 Adaption and Validation of the Picker Employee Questionnaire With Hospital Midwives

The Picker Employee Questionnaire is a useful tool to support employers and human resource managers in shaping and motivating an efficient work environment for midwives.

Katja Stahl, Claudia Schirmer, and Laura Kaiser

e118 Umbilical Cord Care and Infection Rates in Turkey

Dry care seems more appropriate than other methods for umbilical cord care in developing countries.

Gülzade Uysal and Duygu Sönmez Düzkaaya
