## EDITORIAL

The Myth of Women's Choices in U.S.  
Maternity Care, Part 2

## RESEARCH

Effects of Connective Tissue Massage  
on Pain in Primiparous Women After  
Cesarean Birth

Are Women With Threatened Preterm  
Labor More Dehydrated Than Women  
Without It?

Effect of Timing of the First Bath on a  
Healthy Newborn's Temperature

Relationship Between Duration of Tube  
Feeding and Success of Oral Feeding in  
Preterm Infants

Breastfeeding Support Experiences of  
Registered Nurses in a Large Children's  
Hospital System

Administrator Perspectives of Patient-  
Centered and Culturally Appropriate  
Reproductive Health Care for Women  
From Somalia

## HEALTH CARE IMPROVEMENT AND EVALUATION

Facilitating Colostrum Collection by  
Hospitalized Women in the Early  
Postpartum Period for Infant Trophic  
Feeding and Oral Immune Therapy

Risk-Appropriate Care to Improve  
Practice and Birth Outcomes

## SPECIAL REPORT

Current Resources for Evidence-Based  
Practice, September 2018

## IN FOCUS EDITORIAL

Implementation and Outcomes of the  
AWHONN Postpartum Hemorrhage  
Project

## IN FOCUS CNE

Barriers and Facilitators to Implementation  
of a Multistate Collaborative to Reduce  
Maternal Mortality From Postpartum  
Hemorrhage

## IN FOCUS

## EDITORIAL

**589 The Myth of Women's Choices in U.S. Maternity Care, Part 2**

Trial of labor after cesarean and vaginal birth after cesarean remain unavailable for many women in America.

*Nancy K. Lowe*

## RESEARCH

**591 Effects of Connective Tissue Massage on Pain in Primiparous Women After Cesarean Birth**

Massage therapy decreased pain and stress and improved relaxation for women who experienced unplanned cesarean births.

*Mary Colleen Simonelli, Louise T. Doyle, MaryAnn Columbia, Phoebe D. Wells, Kelly V. Benson, and Christopher S. Lee*

**602 Are Women With Threatened Preterm Labor More Dehydrated Than Women Without It?**

Hydration as a therapy for preterm contractions is unlikely to be worthwhile because pregnant women with contractions are not more dehydrated than women without them.

*Michael M. Aziz, Ankita Kulkarni, Oluwafisayo Tunde-Agbede, Carlos W. Benito, and Yinka Oyelese*

**608 Effect of Timing of the First Bath on a Healthy Newborn's Temperature**

Axillary and skin temperatures at 3, 6, or 9 hours of age were not significantly different after bathing healthy newborns.

*Patricia A. Kelly, Kellie A. Classen, Craig G. Crandall, Jeannette T. Crenshaw, Stephanie A. Schaefer, Darlene A. Wade, Matthew N. Cramer, Subhash Aryal, and Kelly R. Fossee*

**620 Relationship Between Duration of Tube Feeding and Success of Oral Feeding in Preterm Infants**

Preterm infants who are anticipated to have extended durations of tube feeding may be at risk for delayed oral feeding success.

*Thao T. Griffith, Aleeca F. Bell, Rosemary White-Traut, Barbara Medoff-Cooper, and Kristin Rankin*

**632 Breastfeeding Support Experiences of Registered Nurses in a Large Children's Hospital System**

Registered nurses returning to work at a Midwestern U.S. children's health system experienced positive workplace lactation support, and break time was positively related to breastfeeding duration.

*Karen Wambach and Emily Britt*

**641 Administrator Perspectives of Patient-Centered and Culturally Appropriate Reproductive Health Care for Women From Somalia**

Specific policies and training designed to improve patient-centered and culturally appropriate reproductive care for women from Somalia are imperative.

*Robin Ann Narruhn*

## HEALTH CARE IMPROVEMENT AND EVALUATION

**654 Facilitating Colostrum Collection by Hospitalized Women in the Early Postpartum Period for Infant Trophic Feeding and Oral Immune Therapy**

Nurses must assist hospitalized mothers of newborns in the NICU as needed to collect colostrum for trophic feedings and colostrum oral immune therapy.

*Barbara Haase, Teresa S. Johnson, and Carol L. Wagner*

**661 Risk-Appropriate Care to Improve Practice and Birth Outcomes**

Improvements in birth outcomes can be made when women with high-risk pregnancies receive care in facilities prepared to provide the level of specialized attention required.

*Lucy R. Van Otterloo and Cynthia D. Connelly*

## SPECIAL REPORT

**673 Current Resources for Evidence-Based Practice, September 2018**

A review of new resources to support the provision of evidence-based care for women and infants.

*Nicole S. Carlson*

**IN FOCUS EDITORIAL**

**684 Implementation and Outcomes of the AWHONN Postpartum Hemorrhage Project**

The Guest Editor introduces this series on the implementation and outcomes of the AWHONN Postpartum Hemorrhage Project.

*Benjamin Scheich*

**IN FOCUS CNE**

**688 Barriers and Facilitators to Implementation of a Multistate Collaborative to Reduce Maternal Mortality From Postpartum Hemorrhage**

**CNE**

Project implementation was facilitated by a step-by-step approach, including education, creation and celebration of milestones, formation of teams to facilitate buy in and empowerment, and persistence.

*Marla Seacrist, Debra Bingham, Benjamin Scheich, and Renee Byfield*

**IN FOCUS**

**698 Perceptions of Safety Improvement Among Clinicians Before and After Participation in a Multistate Postpartum Hemorrhage Project**

Evidence shows that participation in the AWHONN Postpartum Hemorrhage Project increased overall perception of safety during hemorrhagic episodes for clinicians.

*Brenda Chagolla, Debra Bingham, Barbara Wilson, and Benjamin Scheich*

**707 Structure, Process, and Outcome Data of AWHONN's Postpartum Hemorrhage Quality Improvement Project**

The number of risk assessments performed and the number of births with quantified blood loss increased substantially during the PPH Project's 18-month implementation phase.

*Debra Bingham, Benjamin Scheich, and Brian T. Bateman*
