Published for AWHONN by

EDITORIAL

1 **Reconsidering Postpartum Care**

The need for more comprehensive care for women during the postpartum period is clear; there is opportunity for nurses to fill this gap.

Nancy K. Lowe

REVIEWER ACKNOWLEDGMENT

3 **2018 JOGNN Reviewers**

REVIEWS

5 **Scoping Review and Gap Analysis of Research Related to the Health of Women in the U.S. Military, 2000 to 2015**

Most research on the health of women in the U.S. military is of good to excellent quality, but significant gaps still exist.

Robyn Martin Englert and Abigail Marter Yablonsky

16 **Integrative Review of the Factors That Influence Fathers' Involvement in the Breastfeeding of Their Infants**

Nurses can help to change the knowledge and attitudes of fathers along with cultural norms that are unsupportive of fathers' involvement in the breastfeeding process.

Regina Wan Leng Ng, Shefaly Shorey, and Hong-Gu He

RESEARCH

27 **Perinatal Nurses' Experiences With and Knowledge of the Care of Incarcerated Women During Pregnancy and the Postpartum Period**

An urgent need exists for primary and continuing nursing education on the safe, ethical care of incarcerated women during pregnancy and the postpartum period.

Lorie S. Goshin, D. R. Gina Sissoko, Grace Neumann, Carolyn Sufrin, and Lorraine Byrnes

37 **Understanding Placentophagy***

Perceived benefits of placenta consumption (avoiding postpartum depression and improving energy, breastfeeding, and iron stores) were identified by women who engaged in or considered placentophagy.

Claire Stanley, Amanda Baillargeon, and Amanda Selk

50 **Relationships of Reproductive Coercion and Intimate Partner Violence to Unintended Pregnancy**

The authors found relationships among intimate partner violence, reproductive coercion, and unintended pregnancy in a population-based sample of women who recently gave birth.

Wilaiporn Samankasikorn, Jeanne Alhusen, Guofen Yan, Donna L. Schminkey, and Linda Bullock

59 **Musculoskeletal Pelvic Pain and Sexual Function in the First Year After Childbirth**

Participants with musculoskeletal pelvic pain in the first year after childbirth reported more sexual dysfunction and reduced quality of life than participants without pain.

Sandi Tenfelde, Dina Tell, Cynthia Brincat, and Colleen M. Fitzgerald

69 **Health, Physical Growth, and Neurodevelopmental Outcomes in Preterm Infants of Women With Hypertensive Disorders of Pregnancy**

Preterm infants of women with hypertensive disorders of pregnancy were more likely to be small for gestational age but developed at rates similar to preterm infants of normotensive women.

Forgive Avorgbedor, Susan Silva, Elizabeth Merwin, James A. Blumenthal, and Diane Holditch-Davis
