EDITORIAL

119 Use of Statistical Power Analysis in Prospective and Retrospective Research

JOGNNs Assistant Editor for Statistics reviews the use of power analysis for manuscripts submitted for publication consideration.

Oliwier Dziadkowiec

RESEARCH

122 Outcomes of Expectant Management of Term Prelabor Rupture of Membranes

Expectant management at home or in the hospital may be a safe option for low-risk women experiencing term prelabor rupture of membranes without complications.

Irene D. Hagen, Joanne M. Bailey, and Ruth E. Zielinski

133 Effects of Fourth-Degree Perineal Lacerations on Women's Physical and Mental Health

The life-changing effects of fourth-degree perineal lacerations on women's physical and mental health permeated all aspects of their lives.

Cheryl Tatano Beck

143 Managing Ambiguity When Caring for Women Who Experience Stillbirth

The absence of preparatory education, effective protocols, and institutional support for nurses led to ambiguity during care for women who experienced stillbirth.

Natasha Nurse-Clarke

154 Association of Self-Administered Nitrous Oxide for Labor Analgesia With Maternal and Neonatal Process and Outcome Measures

Maternal and neonatal process and outcome measures were similar among women who used nitrous oxide and a comparison group of women who did not use nitrous oxide during labor.

Sandra Hoffman, Abbey Sidebottom, Jane Wrede, Robert Kreiger, Alison Watkins, and Jessica Taghon

167 Path Model Validation of Breastfeeding Intention Among Pregnant Women

The best-fit path model indicates that intention to breastfeed is directly influenced by motivation to breastfeed, attitudes toward breastfeeding, and self-efficacy for breastfeeding.

Na' Tasha Evans, Yu-Lin Hsu, and Jiunn-Jye Sheu

181 Parents' Experiences With a Model of Integrated Maternity and Neonatal Care Designed to Empower Parents

Providing family-integrated care to mother–newborn couplets in single-family rooms offers parents an intensive learning context for independent parenthood at the time of discharge.

Mireille Stelwagen, Anne van Kempen, Alvin Westmaas, Erica Vet, and Fedde Scheele

HEALTH CARE IMPROVEMENT AND EVALUATION

193 Initiative to Increase Skin-to-Skin Contact in the Operating Room After Cesarean

An initiative, including nurse education, team communication, and a new practice guideline, increased skin-to-skin contact within the first hour of life in the operating room after cesarean birth.

Natalie M. Thompson and Angela B. Maeder

CASE REPORT

205 Case Report of Cardiopulmonary Arrest During Pregnancy due to Opioid Overdose

An interdisciplinary approach is needed to care for a pregnant woman in cardiopulmonary arrest with a viable fetus who experiences an opioid overdose.

Tracey E. McMillan, Sarah Austin, and Kristiina Hyrkas

METHODS

214 Translation and Psychometric Analysis of the Japanese Version of the Perceived Maternal Parenting Self-Efficacy Scale

After translation from English to Japanese, there was evidence for adequate reliability and moderate validity of the Japanese Perceived Maternal Parenting Self-Efficacy scale.

Mari Kurokawa, Akio Yamamoto, and Satoshi Takada

SPECIAL REPORT

225 Current Resources for Evidence-Based Practice, March 2021

A review of new resources to support the provision of evidence-based care for women and infants.

Marit L. Bovbjerg
