Childbearing Families, & Newborns*

## EDITORIAL

Black Women's Lives Matter

## CRITICAL COMMENTARY

Pain Relief During Childbirth in the  
Context of 50 Years of Social and  
Technological Change

## REVIEW

Scoping Review of the Associations  
Between Perinatal Substance Use and  
Perinatal Depression and Anxiety

## RESEARCH

Perspectives of Nurses in Mississippi  
on Implementation of the Baby-Friendly  
Hospital Initiative

Women's Experiences With Palliative Care  
During Pregnancy

Nurses' Approaches to Pain Management  
for Women With Opioid Use Disorder in  
the Perinatal Period

Women's Choices Regarding Use of Their  
Newborns' Residual Dried Blood Samples  
in Research

The Needs of Dutch Women During  
Decision-Making About Treatment for  
Miscarriage

Predictors of Negative Childbirth  
Experiences Among French Women

Health Care Providers' Perceptions of  
Quality of Childbirth and Its Associated  
Risks in Poland

Factors That Influence Parents'  
Decision-Making Regarding Termination  
of Pregnancy After Prenatal Diagnosis of  
Fetal Congenital Heart Disease

## SPECIAL REPORT

Current Resources for Evidence-Based  
Practice, July 2021

## AWHONN POSITION STATEMENT

Academic Preparation for Registered  
Nurses

## AWHONN PRACTICE BRIEFS

Guidelines for Active Management of  
the Third Stage of Labor using Oxytocin:  
AWHONN Practice Brief Number 12

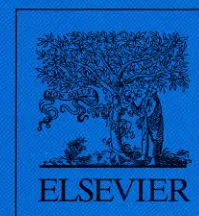

Quantification of Blood Loss: AWHONN  
Practice Brief Number 13

## ONLINE SUPPLEMENT

Perinatal Mood and Anxiety Disorders:  
Research and Implications for  
Nursing Care

11,000 bath

## EDITORIAL

### 363 Black Women's Lives Matter

Black women die from pregnancy-related causes in the United States three times more frequently than White women.

*Nancy K. Lowe*

## CRITICAL COMMENTARY

### 369 Pain Relief During Childbirth in the Context of 50 Years of Social and Technological Change

Historical examination of pain relief during childbirth identifies patterns embedded in our care system and provides insight for nursing priorities in the care of women in labor.

*Mary E. Gibson*

## REVIEW

### 382 Scoping Review of the Associations Between Perinatal Substance Use and Perinatal Depression and Anxiety

Because of the bidirectional relationship between perinatal substance use and perinatal depression/anxiety, it is imperative to address these conditions together in the perinatal period.

*Ryoko Pentecost, Gwen Latendresse, and Marcela Smid*

## RESEARCH

### 392 Perspectives of Nurses in Mississippi on Implementation of the Baby-Friendly Hospital Initiative

Participants from five hospitals in Mississippi shared similar experiences about the process of achieving Baby-Friendly designation and described the overall process as challenging but worthwhile.

*Laura Burnham, Aishat Gambari, Paige Beliveau, Jennifer Ustianov, Margaret G. Parker, and Anne Merewood*

### 402 Women's Experiences With Palliative Care During Pregnancy

The results expand understanding of what women need after life-limiting fetal diagnoses during pregnancy and demonstrate the necessity of perinatal palliative care programs.

*Andrea Crawford, Amelia Hopkin, Mary Rindler, Erin Johnson, Lauren Clark, and Erin Rothwell*

### 412 Nurses' Approaches to Pain Management for Women With Opioid Use Disorder in the Perinatal Period

At times, participants approached pain management for women with opioid use disorder in the perinatal period in ways that were inconsistent with clinical guidelines and resulted in strained relationships.

*Kalyn M. Renbarger and Claire Burke Draucker*

### 424 Women's Choices Regarding Use of Their Newborns' Residual Dried Blood Samples in Research

Nearly half of the participants made uninformed choices about donating their newborns' blood samples for research.

*Elizabeth R. Eisenhauer, Alan R. Tait, Lisa Kane Low, and Cynthia M. Arslanian-Engoren*

### 439 The Needs of Dutch Women During Decision-Making About Treatment for Miscarriage

Health care professionals can support women in the decision-making process regarding treatment for miscarriage by addressing rational and emotional factors.

*Anja G. Bussink-Legters, Agnes van den Hoogen, Sebastiaan Veerema, Wouter J. Meijer, and Henrietta D. L. Ockhuijsen*

### 450 Predictors of Negative Childbirth Experiences Among French Women

Low perceived sense of control during childbirth requires additional attention from health care professionals because it was the strongest predictor of negative childbirth experiences.

*Margaux Chabbert, Patrick Rozenberg, and Jaqueline Wendland*

### 464 Health Care Providers' Perceptions of Quality of Childbirth and Its Associated Risks in Poland

Most maternity providers perceived women as capable of giving birth without medical interventions and described quality of childbirth from a narrow or intermediate perspective.

*Barbara Baranowska, Piotr Szykiewicz, Paulina Pawlicka, Dorota Sys, Maria Węgrzynowska, Anna Kajdy, and Antonina Doroszewska*

### 475 Factors That Influence Parents' Decision-Making Regarding Termination of Pregnancy After Prenatal Diagnosis of Fetal Congenital Heart Disease

Prenatal diagnosis of serious fetal congenital heart disease presents parents with difficult decisions regarding the continuation or termination of pregnancy.

*Yulia Gendler, Einat Birk, Nili Tabak, and Silvia Koton*
