EDITORIAL

655 The Translational Science Spectrum

The Associate Editor describes the importance of the adaptation of scientific knowledge to clinical practice.

Patricia Robin McCartney

REVIEW

659 Integrative Review of Antenatal Milk Expression and Mother–Infant Outcomes During the First 2 Weeks After Birth

The practice of antenatal milk expression beginning at 36 or 37 weeks gestation may support short-term exclusive breastfeeding among mother–infant dyads.

Nina A. Juntreal and Diane L. Spatz

RESEARCH

669 Influence of Appetite and Perceived Ability to Control Cravings on Excessive Gestational Weight Gain

Results suggested that appetite and perceived ability to control cravings may have an effect on gestational weight gain.

Susan W. Groth, Ying Meng, Kuan-Lin Yeh, and I. Diana Fernandez

679 Exploring the Birth Stories of Women on the Autism Spectrum

Birth stories of autistic women were characterized by an uncaring approach by clinicians and sensory overload, which often led to discomfort and trauma.

Laura Foran Lewis, Hannah Schirling, Emma Beaudoin, Hannah Scheibner, and Alexa Cestrono

691 Comfort and Satisfaction Among Women Who Used Different Options for Analgesia During Labor and Birth

Comfort and satisfaction with the birth experience were similar among women who used nitrous oxide, epidural analgesia, or no analgesia during labor and birth.

Tami L. Such and Dawn L. Denny

703 Narrative Inquiry Into Nursing Care of Pregnant Women and Families in Specialized Fetal Diagnosis and Treatment Settings

Nursing care for families coping with fetal diagnoses and treatment is multidimensional and holds potential to influence short- and long-term outcomes for the family.

Abigail Wilpers, Mert Ozan Bahtiyar, Diane Wall, Kathie Kobler, Lois Sadler, Jane Dixon, and Holly Powell Kennedy

714 Women's Length of Stay in a Danish Specialized Unit for Perinatally Bereaved Parents

When offered unlimited stay at a specialized perinatal loss unit, some couples stayed several days, which indicated a need for support not available in standard care.

Dorte Hvidtjørn, Sofie Mørk, Mette Eklund, Rikke Dankjær Maimburg, and Tine Brink Henriksen

724 Skin-to-Skin Contact and the Incidence of Transient Tachypnea of the Newborn

The incidence of transient tachypnea of the newborn was not reduced after the implementation of a Baby-Friendly protocol; however, results underscore the importance of skin-to-skin contact to mitigate symptoms.

Heather Mihalik, Hyo Young Smith, Chanda Mullen, Estee George, Constance Cottrell, Renee Markovich, and Jennifer Savitski

732 Experiences of Women With Disabilities in Accessing and Receiving Contraceptive Care

Women with disabilities encountered numerous barriers to contraceptive care because of assumptions of able-bodiedness in clinical settings.

Willi Horner-Johnson, Krystal A. Klein, Jan Campbell, and Jeanne-Marie Guise

742 Roles and Experiences of Registered Nurses on Labor and Delivery Units in the United States During the COVID-19 Pandemic

Labor and delivery nurses experienced changes in their roles and responsibilities during the COVID-19 pandemic that affected their personal well-being and the provision of patient care.

Erin K. George, Amber Weiseth, and Joyce K. Edmonds

753 Intrapartum Nurses' Beliefs Regarding Birth, Birth Practices, and Labor Support

Intrapartum nurses held beliefs that favored physiologic birth, although some labor practices associated with medicalized birth were also supported.

Lisa Heelan-Fancher and Joyce K. Edmonds

CASE REPORT

765 Case Report of Recurrent Bilateral Mastitis in a Woman Who Is Exclusively Pumping Breast Milk for an Infant in the NICU

A case of bilateral mastitis led to the cessation of breast pumping for a mother with a critically ill neonate and highlights the unique considerations of breast-pumping mothers with hospitalized infants.

Jessica Schwarz, Elizabeth B. Froh, and Diane L. Spatz

PRINCIPLES & PRACTICE

774 Fifty Years of Progress in Neonatal and Maternal Transport for Specialty Care

Regionalization, specialized neonatal care, and neonatal and maternal transport to tertiary centers have helped reduce neonatal mortality rates between 1971 and today.

Shannon E. Perry

SPECIAL REPORT

789 Current Resources for Evidence-Based Practice, November 2021

A review of new resources to support the provision of evidence-based care for women and infants.

Marit L. Bovbjerg
