EDITORIALS

559 In Support of Reproductive Health Justice

The editors argue that restrictions to the provision of essential health care during pregnancy erode efforts to improve maternal health and reduce inequities and violate the Code of Ethics for Nurses.

Joyce K. Edmonds and Heidi Collins Fantasia

562 Collecting and Reporting Accurate Data on Race and Ethnicity Are Necessary to Achieve Health Equity

Limitations to the collection of data on race and ethnicity currently exist, but nurse researchers can implement strategies to conduct more inclusive research.

Nadia N. Abuelezam

RESEARCH

566 Knowledge and Practices Related to Hip-Healthy Swaddling for Newborns Among Maternity Nurses

Cross-sectional survey results of maternity nurses at a single institution suggested the need for more evidence-based, standardized education on hip-healthy swaddling.

Brian Vuong, Joanne Zhou, Meewon Park, Rebecca Patey, Nicole Segovia, Meghan Imrie, and Stephanie Y. Pun

577 Trajectories and Predictors of Symptoms of Depression in Chinese Women From Early Pregnancy to the Early Postpartum Period

The trajectories of symptoms of depression among Chinese women showed significant heterogeneity and were influenced by demographic factors, obstetric factors, and subjective feelings.

Panpan Yan, Xiaoyu Liu, and Jihong Xu

590 Lactation Outcomes After Participation in a Tailored Prenatal Nutrition Consultation Among Women With Infants With Congenital Anomalies

For women who give birth to infants with known congenital anomalies, engagement in a prenatal nutrition consultation resulted in lactation outcomes that far surpass national data.

Elizabeth B. Froh and Diane L. Spatz

599 Trajectories and Correlates of Anger During the Perinatal Period

Persisting anger during pregnancy was associated with worse mood and insomnia after childbirth.

Christine HK Ou, Ivan Sedov, Hangsel Sanguino, Susan Holtzman, and Lianne Tomfohr-Madsen

CASE REPORT

612 Case Report of Idiopathic Intracranial Hypertension in Pregnancy

Women with idiopathic intracranial hypertension who become pregnant have multiple therapeutic options for a safe pregnancy and birth.

Susan Bell

METHODS

620 Cross-Cultural Adaptation and Validation of the Dagbani Readiness for Hospital Discharge Scale–New Mother

Findings provided initial evidence of the reliability and validity of the Dagbani version of the Readiness for Hospital Discharge Scale–New Mother for use in Ghana.

Yenupini Joyce Adams, Elizabeth Lau, Jessica Young, and Ethel Emeffa Ehla

631 Reliability and Validity of a Perinatal Shared Decision-Making Measure: The Childbirth Options, Information, and Person-Centered Explanation

Findings provide initial support for the validity and reliability of the Childbirth Options, Information and Person-Centered Explanation (CHOICES) tool for measuring shared decision making during perinatal care.

Rachel Blankstein Breman, Barbara Resnick, Yolanda Ogbolu, Sophia Dada, and Lisa Kane Low
