Original Articles

- 32 **Disseminating an Evidence-Based Course to Teach Self-Management of Auditory Hallucinations**
Upon completion of a 10-session course on behavioral management of auditory hallucinations, 100% of participants reported being better able to communicate with patients about their voices.
Martha D. Buffum, Robin Kay Buccheri, Louise Nigh Trygstad, and Glenna A. Dowling

- 42 **Mobile Apps for Psychiatric Nurses**
Whether used to track and document contributors to one's health or measures associated with a medical condition, mobile health and medical apps can be beneficial—but should be approached with caution.
Beth L. Elias, Susanne A. Fogger, Teena M. McGuinness, and Katherine R. D'Alessandro

- 48 **The Nurse's Role in Primary Care Antidepressant Medication Adherence**
Care management, patient monitoring, follow up, and patient education performed by nurses were shown to enhance treatment adherence.
Barbara A. Heise and Gwen van Servellen
