Robert H. Howland

Original Articles

- 24** **Nursing Advocacy for Women Veterans and Suicide**
Better rapport and communication are needed to screen for potential risk factors for medical complexities and suicide ideation among women Veterans who are reintegrating to civilian life.
Patricia L. Conard, Myrna L. Armstrong, Cathy Young, and La Micha Hogan
- 32** **Understanding the Perspectives of Family Members on Telephone Intervention for Individuals With Schizophrenia: Results of a Focus Group**
Five major themes emerged from the focus group: isolation, negative emotions, recognition of illness, communication with providers, and problem solving.
Lara Humphrey Beebe and David W. Schuman
- 39** **The Engagement Model for Reducing Seclusion and Restraint: 13 Years Later**
One facility was able to reduce the use of seclusion and restraint for more than one decade by minimizing the power differential between staff and patients.
Martha Blair and Fletcher Moulton-Adelman
