Disaster Strikes! Long-Term Care Resident Outcomes Following a Natural Disaster

This rare look into the effects of a short-term evacuation describes the cognitive and physiological outcomes of frail nursing home residents after a severe summer storm causes extensive power outages.

Pamela Z. Cacchione, PhD, APRN, BC; Lisa M. Willoughby, PhD; Joanne C. Langan, PhD, RN; and Kenneth Culp, PhD, RN

Recurrent Falls among Community-Dwelling Older Koreans: Prevalence and Multivariate Risk Factors

The findings of this study revealed significant predictors of falls and recurrent falls. Assessing for risk factors is the first step; developing individualized preventive programs comes next.

In-Young Yoo, PhD, RN

Reassessing Nurse Aide Job Satisfaction in a Texas Nursing Home

Knowing what nurse aides are least satisfied with is important, but knowing the solutions and trends that have been used successfully in the industry is just as essential. Job satisfaction is related to rewards, workload, and team environment among coworkers.

Mark A. Thompson, PhD; Kathleen K. Horne, MBA; and Timothy R. Huerta, PhD
