## Patient Safety in the Nursing Home: How Nursing Staff Assess and Communicate about Change in Condition

Workers evidenced a strong capacity for observing clinical changes, but assessment of and communication about such changes were limited. Staff training materials were developed from the findings.

## Transitions in Care among Older Adults Receiving Long-Term Services and Supports

Recipients of long-term services and supports and their family caregivers are often left in the dark about the reasons and plans for transitions between health care settings. Engagement, support, and empowerment can prevent your patients from feeling this way.

*Mark P. Toles, PhD, RN; Katherine M. Abbott, PhD; Karen B. Hirschman, PhD, MSW; and Mary D. Naylor, PhD, RN*

## The Impact of Health-Related Quality of Life on Suicidal Ideation and Suicide Attempts among Korean Older Adults

Self-rated depression may be a more significant risk factor for suicide ideation than physician-diagnosed depression. Be ready to use the EuroQoL 5D to identify at-risk individuals.

*Jin-Won Kwon, PhD; and Jong-Hee Kim, MPH*
