Examining the Association of Health Literacy and Health Behaviors in African American Older Adults: Does Health Literacy Affect Adherence to Antihypertensive Regimens?

In this sample of 121 patients, approximately half did not adhere to their treatment regimen. Health literacy may have been an influence, but age and health status were found to be even more significant.

Racquel Richardson Ingram, PhD, RN; and L. Louise Ivanov, PhD, RN

Appraisal of the Quality of Care of Older Adults with Cognitive Impairment in the Emergency Department

This study suggests that older adults with cognitive impairment in the ED do not receive optimal care according to the quality indicators for geriatric emergency care. ED nurses are encouraged to adopt a systematic approach to early screening for cognitive issues.

An Examination of Successful Aging among Southern Black and White Older Adults

In an investigation to reveal the nuances of successful aging that are specific to this particular population, 4 central themes were found: Connecting and Relating, Temporality, Perception and Interpretation, and Activity.

Meredith Troutman-Jordan, PhD, PMHCNS-BC; Mary A. Nies, PhD, RN, FAAN, FAAHB; and Boyd Davis, PhD
