GERONTOLOGICAL NURSING®

SPECIAL ISSUE: CRITICAL CARE

Guest Editor: Mary Beth Happ, PhD, RN, FAAN

FEATURE ARTICLES

12

The Study of Activity in Older ICU Patients: An Integrative Review

Activity interventions to promote progressive mobility in ICU patients are discussed, with future studies warranted for this specific high-risk population.

Colleen M. Casey, PhD, ANP-BC, CNS

28

Symptom Communication During Critical Illness: The Impact of Age, Delirium, and Delirium Presentation

Oral or endotracheal intubation and fluctuating neurocognitive status can complicate symptom communication in patients in the ICU, making delirium assessment and symptom identification difficult.

Judith A. Tate, PhD, RN; Susan Sereika, PhD; Dana Divergilio, MPH; Marci Nilsen, PhD, RN; Jill Demerci, PhD, RN; Grace Campbell, PhD, MSW, RN; and Mary Beth Happ, PhD, RN, FAAN

39

Extending the ABCDE Bundle to the Post-Intensive Care Unit Setting

An evidence-based, interprofessional, multicomponent approach is presented to help improve the quality of care provided to seriously ill older adults in the ICU and beyond.

Michele Balas, PhD, RN, APRN-NP, CCRN; Rose Buckingham, MSN, APRN, GNP-BC; Tami Braley, RN, BSN; Sarah Saldi, RN, BSN; and Eduard E. Vasilevskis, MD

52

Improving Care at End of Life in the ICU: A Proposal for Early Discussion of Goals of Care

Nurses can play a pivotal role in instituting mandatory goals-of-care discussions for critically ill patients, improving the outcomes for this population and their families at end of life in the ICU.

Jennifer B. Seaman, BSN, RN

60

Family-Centered End-of-Life Care in the ICU

Surrogates, family members, and health care providers must collaborate in end-of-life decisions to ensure high-quality care in the ICU.

Debra L. Wiegand, PhD, RN, CCRN, CHPN, FAAN; Marian S. Grant, DNP, RN, CRNP, ACHPN; Jaeyoung Cheon, MSN, RN; and Mary A. Gergis, PhD, RN
