## Multisensory Installations in Residential Aged-Care Facilities: Increasing Novelty and Encouraging Social Engagement Through Modest Environmental Changes

Simple changes to the indoors can create an environment that is more reminiscent of home and provide the stimulus for social exchange, which can enhance the well-being of older adults in long-term care settings.

*Theresa L. Scott, PhD; Barbara M. Masser, PhD; and Nancy A. Pachana, PhD*

36

## Using Targeted Messaging to Increase Physical Activity in Older Adults: A Review

Individualized oral or written brief communications, regardless of mode of delivery, frequency, or topic, were shown to increase older adults' motivation to become or remain physically active.

*Rachel E. Ostrander, MN, RN; Hilaire J. Thompson, PhD, RN, CNRN, ACNP-BC, FAAN; and George Demiris, PhD, FACMI*

50

## The Impact of an Acute Psychiatry Environment on Older Patients and Their Families

Patients with mental health needs and dementia experience greater challenges when adjusting to or coping with environmental stressors. A home-like, supportive, and safe environment was shown to promote healing and positive care experiences for both patients and families.

*Lillian Hung, MA, RN; Elizabeth Loewen, MSN, RN; Buffy Bindley, RPN; Debra McLaren, RPN; Travis Feist, RPN; and Alison Phinney, PhD, RN*
