## FEATURE ARTICLES

22

### Orthostatic Hypotension in Older Adults With Dementia

Many older adults with progressive dementia are commonly treated with psychotropic medications, which can place them at risk for orthostatic hypotension. Recognition of symptoms and accurate blood pressure assessment can lead to successful treatment.

*Mary Alice Momeyer, DNP, ANP-BC, GNP-BC*

32

### Prostate Cancer and Quality of Life: Analysis of Response Shift Using Triangulation Between Methods

This study found that despite survival, the quality of life of patients is low during the disease continuum. Health care providers should be aware of response shifts and plan, evaluate, and time appropriate interventions for patients' side effects.

*Bernat-Carles Serdà i Ferrer, PhD; Arantza del Valle, PhD, MSc; and Rafael Marcos-Gragera, MD, PhD*

42

### Medication Management Roles in Assisted Living

Medication management requires the involvement of multiple professions and unlicensed staff who must communicate with one another to accomplish this process. Clear role expectations, policies, staff support, and training for the role of medication aide are critical to quality and avoidance of bad outcomes.

*Suzanne K. Sikma, PhD, RN; Heather M. Young, PhD, RN, FAAN; Susan C. Reinhard, PhD, RN, FAAN; Donna J. Munroe, PhD, RN; Juliana Cartwright, PhD, RN; and Glenise McKenzie, PhD, RN*
