FEATURE ARTICLES

24

Care Aides' Relational Practices and Caring Contributions

Using Swanson's Middle Range Theory of Caring, the authors sought to understand care aides' experiences of their roles and work in nursing homes and how managers can reinforce the meaning and value of their work.

Elizabeth A. Andersen, PhD, RN; and Jude Spiers, PhD, RN

34

Morbidity and Mortality Following Relocation of Highly Dependent Long-Term Care Residents: A Retrospective Analytical Study

Residents were found to experience increased levels of stress before and after relocation, indicating the need for nursing staff to implement proper planning and vigilance to minimize distress in these patients.

Sarah Mello, MD, MRCPI; and Kieran A. O'Connor, MD, MRCPI
