FEATURE ARTICLES

26 **Ask the Right Questions: What Do Non-Caregiving Adult Children Need From Health Care Providers?**

Lack of holistic care, lack of effective communication, and fragmented care and need for better care management were themes revealed in the current study regarding adult children's experiences and perceptions of providers in the care of older adults who are healthy, functional, and cognitively intact.

Munira Wells, PhD, RN; and Connie Kartzog, PhD, RN, MS, FNP-BC

32 **Through the Eyes of Nurse Managers in Long-Term Care: Identifying Perceived Competencies and Skills**

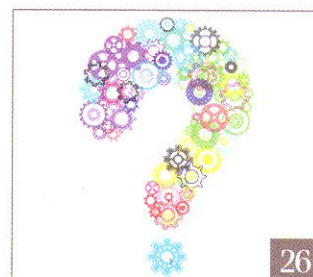

Using the Nurse Manager Inventory Tool, the authors found that few nurse managers responded at an expert level, indicating their competencies must be developed over time through educational support and guided mentorship.

Kathleen H. Dever, EdD, MS, RN

39 **Health Benefits and Risks of Pets in Nursing Homes: A Survey of Facilities in Ohio**

Although animals are frequently permitted in nursing homes, many facilities lack policies that address key components of protocols to enhance the safety of human-animal interactions.

Jason W. Stull, PhD, VMD, MPVM, DACVPM; Cydney C. Hoffman, MPH-VPH, BA; and Timothy Landers, PhD, RN, CNP, CIC
