FEATURE ARTICLES

- 21** **Fall Prevention Among Community-Dwelling Older Adults: Current Guidelines and Older Adult Responses**
 Older adults have a high awareness of falls and believe they can reduce their risk of falling; however, their participation in community fall prevention programs is low.

Helen W. Lach, PhD, RN, CNL, FGSA, FAAN; and Wanida Noimontree, PhD, RN, GNC

- 30** **Evaluating the Usability and Acceptability of Communication Tools Among Older Adults**
 Although communication boards may be easier for older adults to use, older adults believe that with additional time and training, communication apps can be efficient and useful, offering more options and features.

Marci Lee Nilsen, PhD, RN, CHPN[®]; Allison Morrison, DPT, PT, ATC; Jennifer H. Lingler, PhD, CRNP; Brad Myers, PhD; Jonas T. Johnson, MD; Mary Beth Happ, PhD, RN, FAAN, FGSA; Susan M. Sereika, PhD; and Annette DeVito Dabbs, PhD, RN, FAAN

- 41** **Outcomes of Patients With Delirium in Long-Term Care Facilities: A Prospective Cohort Study**
 Overall incidence of delirium among long-term care patients was 48%, which is approximately twice as high as that in patients in intensive care units and hospitals, suggesting preventive interventions are necessary in this setting.

Kyoung Ja Moon, PhD, RN, APN; and Heeok Park, PhD, RN
