FEATURE ARTICLES

21 Hydration Status of Assisted Living Memory Care Residents

Water intake of residents was inadequate, placing them at risk for dehydration, and justifying the need for care standards for increasing recommended water intake.

Phyllis M. Gaspar, PhD, RN; Cindy A. Scherb, PhD, RN; and Felix Rivera-Mariani, PhD

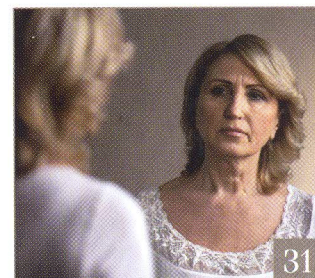

21

31 Women's Perceptions of Retirement

Specific assistance and planning for women during and after retirement is essential for this life transition to be a positive experience and to decrease health-related situations.

Francine Hebert Sheppard, PhD, RN, CNE; and Deb Stanford, MSN, RN

31

40 Relationships Among Social Support, Coping Strategy, and Depressive Symptoms in Older Adults With Diabetes

Interventions focused on improving social support and helping older adults adopt positive coping strategies may help alleviate depressive symptoms in this population.

Ling-Na Kong, PhD; Wen-Fen Zhu, MD; Shan He, MD; Yu Yao, MD; and Li Yang, PhD
