FEATURE ARTICLES

21 **The Role, Education, and Experience of Health Care Assistants in End-of-Life Care in Long-Term Care: A Scoping Review**

Better integration of health care assistants into the care team, appropriate end-of-life care education, and support to cope with resident deaths were major needs identified in this review.

Una Cronin, RGN, MSc; Joan McCarthy, PhD; and Nicola Cornally, PhD

21

30 **Resilience in Bereaved Caregivers of Persons With Dementia**

Nurses have the capacity to enhance family resilience and provide a positive grief experience by affirming positive coping and redirecting negative responses to the loss of a loved one.

Elizabeth Jane Jensen, BSN, RN; Katherine P. Supiano, PhD; Marilyn Luptak, PhD; Troy Anderson, PhD; and Cynthia Beynon, MSN, RN

30

37 **Perceived Benefits of Using Nonpharmacological Interventions in Older Adults With Alzheimer's Disease or Dementia With Lewy Bodies**

According to caregivers, their care recipients experienced positive benefits, such as improved communication and physical function, from chair yoga, music intervention, and chair-based exercise.

Juyoung Park, PhD; Heather Howard, PhD; Magdalena I. Tolea, PhD; and James E. Galvin, MD, MPH
