Journal Information

Nursing Research has a long and distinguished record in the history of nursing science. Since its launch in 1952, *Nursing Research* has been a "cooperative venture" of scientists, professional organizations, publisher, editorial staff, and readers to circulate scientific papers in nursing to improve care, alleviate suffering, and advance well-being. Today, *Nursing Research* continues as a preeminent journal in the field, and is the official journal of the Eastern Nursing Research Society (ENRS) and the Western Institute of Nursing (WIN).

Nursing Research publishes regular papers and brief reports in the following areas:

• **Empirical Findings about**

- Health and illness experiences of individuals, families, and communities
- Prevention and therapeutic self-care, nursing, and health team interventions
- Nursing systems, quality of care, and patient outcomes
- Health and illness over time, across the lifespan
- Health and illness in social and physical context
- Nursing education, when focused on issues related to research curriculum, research instruction, or investigator development at any career development stage

• **Biology Reviews**

- Current advances in basic biological sciences related to emerging areas of nursing science
- Translational research related to emerging areas of nursing science
- See the Call for Papers (below): Biology Reviews for Nursing Research
