

Nursing Research[®]

Advancing the Science
Improving Patient Care

Official Journal of the Eastern Nursing Research Society and the Western Institute of Nursing

- ▶ **Evaluation of Dynamic Weight Bearing for Measuring Nonevoked Inflammatory Hyperalgesia in Mice**
Mari A. Griffioen, Valerie H. Dernetz, Gee Su. Yang, Kathleen A. Griffith, Susan G. Dorsey, and Cynthia L. Renn
- ▶ **Barthel Index of Activities of Daily Living: Item Response Theory Analysis of Ratings for Long-Term Care Residents**
Wen Liu, Jay Unick, Elizabeth Galik, and Barbara Resnick
- ▶ **Multilevel Drivers of Human Immunodeficiency Virus/Acquired Immune Deficiency Syndrome Among Black Philadelphians: Exploration Using Community Ethnography and Geographic Information Systems**
Bridgette M. Brawner, Janaiya L. Reason, Bridget A. Goodman, Jean J. Schensul, and Barbara Guthrie

Health Equity Research Series

- ▶ **Prenatal Care in Oregon and Washington: Policy and Utilization for Vulnerable Women**
Angie Docherty and Alison L. Johnston

Reliability: Special Focus Section

- ▶ **Conceptions of Reliability Revisited and Practical Recommendations**
Klaas Sijtsma and L. Andries van der Ark
- ▶ **Response to Sijtsma and van der Ark (2015): "Conceptions of Reliability Revisited and Practical Recommendations"**
Byron Gajewski, Larry R. Price, and Marjorie Bott
- ▶ **The Problem With Cronbach's Alpha: Comment on Sijtsma and van der Ark (2015)**
Claudio Barbaranelli, Christopher S. Lee, Ercole Vellone, and Barbara Riegel
- ▶ **Further Discussion on Reliability: The Art of Reliability Estimation**
Yanyun Yang and Samuel B. Green
- ▶ **The Many Issues in Reliability Research: Choosing From a Horn of Plenty**
Klaas Sijtsma and L. Andries van der Ark

Journal Information

Nursing Research has a long and distinguished record in the history of nursing science. Since its launch in 1952, *Nursing Research* has been a "cooperative venture" of scientists, professional organizations, publisher, editorial staff, and readers to circulate scientific papers in nursing to improve care, alleviate suffering, and advance well-being. Today, *Nursing Research* continues as a preeminent journal in the field, and is the official journal of the Eastern Nursing Research Society (ENRS) and the Western Institute of Nursing (WIN).

Nursing Research publishes regular papers and brief reports in the following areas:

• **Empirical Findings about**

- Health and illness experiences of individuals, families, and communities
- Prevention and therapeutic self-care, nursing, and health team interventions
- Nursing systems, quality of care, and patient outcomes
- Health and illness over time, across the lifespan
- Health and illness in social and physical context
- Nursing education, when focused on issues related to research curriculum, research instruction, or investigator development at any career development stage

• **Biology Reviews**

- Current advances in basic biological sciences related to emerging areas of nursing science
- Translational research related to emerging areas of nursing science

• **Point-of-Care Research Series**

Topics include but are not limited to use of devices and information technology at the point-of-care, patient safety issues, m-health, telehealth, system interoperability, design and evaluation of "smart" environments across the health-illness continuum, learning health systems, communication and decision making in emerging technology-supported point-of-care settings; quality and ethical issues. Papers may be enhanced to include video or interactive graphs using supplemental digital content. Submissions may be regular full-length papers or research briefs. In the letter to the editor uploaded with submissions, please mention that the paper should be considered for the point-of-care research series.

For additional information and editorial commentary related to the Point-of-Care Research Series, go to: http://journals.lww.com/nursingresearchonline/Fulltext/2014/07000/Point_of_Care_Research__A_New_Series_for_Nursing.1.aspx

• **Health Equity Research Series**

Nursing Research invites papers reporting findings of original research across the scope of health equity. Topics include but are not limited to (a) research implications of definitions, concepts, and measurement of health equity; (b) cross-cultural and longitudinal validity of health equity indicators; or (c) using toolkits and other technical resources to support community capacity building, and models for describing, guiding and testing progress towards health equity. Topics related to interventions are especially welcome, such as (a) how to effectively build community capacity to implement, evaluate and sustain programs and policies to promote health equity; (b) how to reduce persistent, population-specific health disparities using a health equity framework; (c) designing and testing culturally-tailored interventions for high-risk communities; (d) how to address social determinants of health in an intervention framework; and (e) using culturally appropriate evaluation strategies for targeted interventions to establish best practices and support evidence-based approaches to reduce health disparities and achieve health equity.

For editorial on health equity, please see Dr. John Lowe's commentary at: http://journals.lww.com/nursingresearchonline/Fulltext/2015/01000/Health_Equity_Research__A_New_Ongoing_Series_in.1.aspx
