

Nursing Research[®]

Advancing the Science
Improving Patient Care

Official Journal of the Eastern Nursing Research Society and the Western Institute of Nursing

- ▶ **Factors Associated With Feeding Progression in Extremely Preterm Infants**
Jinhee Park, George Knafel, Suzanne Thoyre, and Debra Brandon
- ▶ **No Evidence of Purported Lunar Effect on Hospital Admission Rates or Birth Rates**
Jean-Luc Margot

- ▶ **Nursing Case Management, Peer Coaching, and Hepatitis A and B Vaccine Completion Among Homeless Men Recently Released on Parole: Randomized Clinical Trial**

Adeline Nyamathi, Benissa E. Salem, Sheldon Zhang, David Farabee, Betsy Hall, Farinaz Khalilifard, and Barbara Leake

- ▶ **Psychosocial Determinants of Physical Activity in Children Attending Afterschool Programs: A Path Analysis**

Jiyong Ling, Lorraine B. Robbins, Valerie Lander McCarthy, and Barbara J. Speck

Health Equity Research Series

- ▶ **Leadership and Cultural Competence of Healthcare Professionals: A Social Network Analysis**

Marie Dauvrin and Vincent Lorant

- ▶ **Neighborhood Socioeconomic Status During Childhood Versus Puberty in Relation to Endogenous Sex Hormone Levels in Adult Women**

Maria E. Bleil, Bradley M. Appelhans, Melissa D. Latham, Michelle A. Irving, Steven E. Gregorich, Nancy E. Adler, and Marcelle I. Cedars

Point-of-Care Research Series

- ▶ **The Effect of Patient Migration in Bed on Torso Elevation**

Neal Wiggermann, Susan Kotowski, Kermit Davis, and Catherine VanGilder

- ▶ **Electronic Alerts for Triage Protocol Compliance Among Emergency Department Triage Nurses: A Randomized Controlled Trial**

James F. Holmes, Joshua Freilich, Sandra L. Taylor, and David Buettner

POINT-OF-CARE RESEARCH SERIES

The Effect of Patient Migration in Bed on Torso Elevation	221
<i>Neal Wiggermann, Susan Kotowski, Kermit Davis, and Catherine VanGilder</i>	
Electronic Alerts for Triage Protocol Compliance Among Emergency Department Triage Nurses: A Randomized Controlled Trial	226
<i>James F. Holmes, Joshua Freilich, Sandra L. Taylor, and David Buettner</i>	

Journal Information

Nursing Research has a long and distinguished record in the history of nursing science. Since its launch in 1952, *Nursing Research* has been a "cooperative venture" of scientists, professional organizations, publisher, editorial staff, and readers to circulate scientific papers in nursing to improve care, alleviate suffering, and advance well-being. Today, *Nursing Research* continues as a preeminent journal in the field, and is the official journal of the Eastern Nursing Research Society (ENRS) and the Western Institute of Nursing (WIN).

Nursing Research publishes regular papers and brief reports in the following areas:

• **Empirical Findings about**

- Health and illness experiences of individuals, families, and communities
- Prevention and therapeutic self-care, nursing, and health team interventions
- Nursing systems, quality of care, and patient outcomes
- Health and illness over time, across the lifespan
- Health and illness in social and physical context
- Nursing education, when focused on issues related to research curriculum, research instruction, or investigator development at any career development stage

• **Biology Reviews**

- Current advances in basic biological sciences related to emerging areas of nursing science
- Translational research related to emerging areas of nursing science

• **Point-of-Care Research Series**

Topics include but are not limited to use of devices and information technology at the point-of-care, patient safety issues, m-health, telehealth, system interoperability, design and evaluation of "smart" environments across the health-illness continuum, learning health systems; communication and decision making in emerging technology-supported point-of-care settings; quality and ethical issues. Papers may be enhanced to include video or interactive graphs using supplemental digital content.

Submissions may be regular full-length papers or research briefs. In the letter to the editor uploaded with submissions, please mention that the paper should be considered for the point-of-care research series.

For additional information and editorial commentary related to the Point-of-Care Research Series, go to: http://journals.lww.com/nursingresearchonline/Fulltext/2014/07000/Point_of_Care_Research__A_New_Series_for_Nursing.1.aspx

• **Health Equity Research Series**

Nursing Research invites papers reporting findings of original research across the scope of health equity. Topics include but are not limited to (a) research implications of definitions, concepts, and measurement of health equity; (b) cross-cultural and longitudinal validity of health equity indicators; or (c) using toolkits and other technical resources to support community capacity building, and models for describing, guiding and testing progress towards health equity. Topics related to interventions are especially welcome, such as (a) how to effectively build community capacity to implement, evaluate and sustain programs and policies to promote health equity; (b) how to reduce persistent, population-specific health disparities using a health equity framework; (c) designing and testing culturally-tailored interventions for high-risk communities; (d) how to address social determinants of health in an intervention framework; and (e) using culturally appropriate evaluation strategies for targeted interventions to establish best practices and support evidence-based approaches to reduce health disparities and achieve health equity.

For editorial on health equity, please see Dr. John Lowe's commentary at: http://journals.lww.com/nursingresearchonline/Fulltext/2015/01000/Health_Equity_Research__A_New_Ongoing_Series_in.1.aspx
