

Nursing Research[®]

Advancing the Science
Improving Patient Care

Official Journal of the Eastern Nursing Research Society and the Western Institute of Nursing

▶ **Mining Patterns Associated With Mobility Outcomes in Home Healthcare**

Sanjoy Dey, Jacob Cooner, Connie W. Delaney, Joanna Fakhoury, Vipin Kumar, Gyorgy Simon, Michael Steinbach, Jeremy Weed, and Bonnie L. Westra

▶ **Home-Based Exercise in Older Adults Recently Discharged From the Hospital for Cardiovascular Disease in China: Randomized Clinical Trial**

Xueyu Li, Shunlin Xu, Lijuan Zhou, Rongbin Li, and Jianrong Wang

▶ **Pain and Aggression in Nursing Home Residents With Dementia: Minimum Data Set 3.0 Analysis**

Hyochol Ahn, Cynthia Garvan, and Debra Lyon

▶ **Attitudes of Nurses and Physicians About Clinical Autopsy in Neonatal and Adult Hospital Care: A Survey in Sweden**

Berit Mjörnheim, Anders Rosendahl, Lennart C. Eriksson, and Christina Takman

▶ **Nursing Case Management and Glycemic Control Among Brazilians With Type 2 Diabetes: Pragmatic Clinical Trial**

Ricardo Castanho Moreira, Maria de Fátima Mantovani, and José Verdú Soriano

▶ **Potential for Self-Management in Chronic Care: Nurses' Assessments of Patients**

Irene Bos-Touwen, Evellen Dijkkamp, Marijke Kars, Jaap Trappenburg, Niek De Wit, and Marieke Schuurmans

Point-of-Care Research Series

▶ **Longitudinal Association of Registered Nurse National Nursing Specialty Certification and Patient Falls in Acute Care Hospitals**

Diane K. Boyle, Emily Cramer, Catima Potter, and Vincent S. Staggs

▶ **Sacral Peak Pressure in Healthy Volunteers and Patients With Spinal Cord Injury: With and Without Liquid-Based Pad**

Stephan Duetzmann, Lynn M. Forsey, Christian Senft, Volker Seifert, John Ratliff, and Jon Park

Biology Review Series

▶ **Antenatal Microbiome: Potential Contributor to Fetal Programming and Establishment of the Microbiome in Offspring**

Michelle L. Wright and Angela R. Starkweather

Lippincott Williams & Wilkins

*Margaret McCarthy and Margaret Grey***Journal Information**

Nursing Research has a long and distinguished record in the history of nursing science. Since its launch in 1952, *Nursing Research* has been a "cooperative venture" of scientists, professional organizations, publisher, editorial staff, and readers to circulate scientific papers in nursing to improve care, alleviate suffering, and advance well-being. Today, *Nursing Research* continues as a preeminent journal in the field, and is the official journal of the Eastern Nursing Research Society (ENRS) and the Western Institute of Nursing (WIN).

Nursing Research publishes regular papers and brief reports in the following areas:

- **Empirical Findings about**

- Health and illness experiences of individuals, families, and communities
- Prevention and therapeutic self-care, nursing, and health team interventions
- Nursing systems, quality of care, and patient outcomes
- Health and illness over time, across the lifespan
- Health and illness in social and physical context
- Nursing education, when focused on issues related to research curriculum, research instruction, or investigator development at any career development stage

- **Biology Reviews**

- Current advances in basic biological sciences related to emerging areas of nursing science
- Translational research related to emerging areas of nursing science

- **Point-of-Care Research Series**

Topics include but are not limited to use of devices and information technology at the point-of-care, patient safety issues, m-health, telehealth, system interoperability, design and evaluation of "smart" environments across the health-illness continuum, learning health systems; communication and decision making in emerging technology-supported point-of-care settings; quality and ethical issues. Papers may be enhanced to include video or interactive graphs using supplemental digital content. Submissions may be regular full-length papers or research briefs. In the letter to the editor uploaded with submissions, please mention that the paper should be considered for the point-of-care research series.

For additional information and editorial commentary related to the Point-of-Care Research Series, go to: http://journals.lww.com/nursingresearchonline/Fulltext/2014/07/000/Point_of_Care_Research__A_New_Series_for_Nursing.1.aspx

- **Health Equity Research Series**

Nursing Research invites papers reporting findings of original research across the scope of health equity. Topics include but are not limited to (a) research implications of definitions, concepts, and measurement of health equity; (b) cross-cultural and longitudinal validity of health equity indicators; or (c) using toolkits and other technical resources to support community capacity building, and models for describing, guiding and testing progress towards health equity. Topics related to interventions are especially welcome, such as (a) how to effectively build community capacity to implement, evaluate and sustain programs and policies to promote health equity; (b) how to reduce persistent, population-specific health disparities using a health equity framework; (c) designing and testing culturally-tailored interventions for high-risk communities; (d) how to address social determinants of health in an intervention framework; and (e) using culturally appropriate evaluation strategies for targeted interventions to establish best practices and support evidence-based approaches to reduce health disparities and achieve health equity.

For editorial on health equity, please see Dr. John Lowe's commentary at: http://journals.lww.com/nursingresearchonline/Fulltext/2015/01/000/Health_Equity_Research__A_New_Ongoing_Series_in.1.aspx
