# Maternal-Newborn Safety During the COVID-19 PANDEMIC

ELSEVIER

### EDITORIAL & UPDATES

#### FROM THE EDITOR

159 Back to Normal?

*The massive upheaval that the COVID-19 pandemic has brought to all our lives has caused many of us to think long and hard about what kind of future we want and need.*

Mary C. Brucker

#### RESEARCH & PRACTICE BRIEFS

161 Impact of the COVID-19 Pandemic on Nurses  
Summer Hunt

#### COMMENTARY

167 Eradicating Racism From Maternity Care Begins With Addressing Implicit Bias  
*Addressing implicit bias is a necessary part of an overall strategy to improve maternal morbidity and mortality among Black women.*  
Samantha Russell

### CLINICAL EVALUATION & IMPROVEMENT

170 Quiet Time to Increase Breastfeeding Rates and Enhance Women's Hospital Experiences in the Postpartum Period

*A daily afternoon quiet time that reduces interruptions to hospitalized, medically stable women in the postpartum period may increase exclusive breastfeeding rates and women's satisfaction with their hospital experiences.*

Christen Lawrie, Martha E.F. Highfield & Sherri Mendelson

179 Experiences of Pregnant Women With Obesity

*By understanding how pregnant women with obesity feel about their bodies, nurses can provide more compassionate care during the prenatal, perinatal, and postpartum time periods.*

Mary Beth McCloud & Julie Barosso

187 Use of a Standardized Tool to Identify Women at Risk for Hereditary Breast and Ovarian

*Using a standardized risk assessment tool may help clinicians identify women at risk for hereditary breast and ovarian cancer and increase rates of referral of at-risk women to genetic counseling.*

Melissa Hessoock, Tracy Brewer, Sadie Hutson & Jeff Anderson

### REVIEWS

198 An Integrative Review of Fertility Knowledge and Fertility-Awareness Practices Among Women Trying to Conceive

CNE

*Women seeking pregnancy have low to moderate fertility-awareness knowledge; health care providers should provide fertility-awareness based education to women who seek pregnancy.*

Melissa Perez Capotosto

207 Literature Review of the Association Between Prenatal Education and Rates of Cesarean Birth Among Women at Low Risk

*Evidence from this literature review supports the premise that prenatal education classes should be routinely incorporated into maternity care in an effort to reduce cesarean birth rates for the low-risk population.*

Sabrina Ronco

### IN PRACTICE

212 Maintaining Maternal–Newborn Safety During the COVID-19 Pandemic

*Being prepared for rapid change is essential for nurses and other clinicians caring for the maternal–newborn population during a pandemic.*

Nancy A. Patrick & Teresa S. Johnson

221 Development and Implementation of an Obstetric Milestone Pathway

*A team at a large health care system developed and implemented an obstetric milestone pathway with the aim of improving the quality, safety, and efficiency of maternal/newborn care.*

Kendra L. Folh & Patricia Heale

229 Milk Flow Rates From Bottle Nipples: What We Know and Why It Matters

*Flow rates vary widely between different types of bottle nipples and can affect an infant's ability to maintain physiologic stability and airway safety during oral feeding.*

Britt Frisk Pados

Continued

## Continued

## REFLECTIONS

### 238 Pass It On

*A nurse reflects on the vital role clinical preceptors play in teaching, supporting, and inspiring the next generation of nurses.*

Janet Adams Tucker
