EDITORIAL & UPDATES

FROM THE EDITOR

69 Our Commitment to Justice, Equity, Diversity, and Inclusion

The editors and Editorial Advisory Board of Nursing for Women's Health are committed to promoting the principles of justice, equity, diversity, and inclusion.

Kortney Floyd James & Heidi Collins Fantasia

RESEARCH & PRACTICE BRIEFS

72 Pregnancy Length in the United States Versus European Countries

Jennifer P. Hellwig

CLINICAL EVALUATION & IMPROVEMENT

79 Implementing the Role of Neonatal Assessment Nurse to Improve Skin-to-Skin Care and Breastfeeding Exclusivity

Implementing the new role of neonatal assessment nurse was associated with improved initiation of skin-to-skin care and breastfeeding exclusivity, and it did not require hiring of new staff.

Sino George, Darlene Showalter & Kimberly Graham

90 Maternity Care Clinicians' Experiences Promoting Infant Safe Sleep and Breastfeeding During the COVID-19 Pandemic

During pandemics, additional parent education and psychosocial care for clinicians may address clinician burnout and potentially limited promotion of infant safe sleep and breastfeeding.

Meera Menon, Rebecca Huber, Rebecca B. Russell, Lori Feldman-Winter, Michael H. Goodstein, Stacy Scott & Scott D. Berns

103 Pregnancy Outcomes in Patients Enrolled in the Healthy Beginnings Plus Program

Rates of preterm birth and low-birth-weight neonates were similar between individuals with Medical Assistance insurance enrolled versus not enrolled in Healthy Beginnings Plus.

Maranda Sullivan, Sara Lange, Amanda Young, Matthew Gass, A. Dhanya Mackeen & Michael J. Paglia

110 Improving Communication to Neonatal Resuscitation Team Members During High-Risk Births

Implementing a communication tool for use in high-risk births may improve communication to neonatal resuscitation team members, enhance preparation for neonatal care, and increase team members' satisfaction with interprofessional communication.

Daniel E. Brewer, Stephanie Lewis & Sherry L. Seibenhener

REVIEW

121 State of the Science on the Benefits of Human Milk for Hospitalized, Vulnerable Neonates

Human milk, especially a mother's own milk, reduces the risk and severity of illness and reduces risk of death in hospitalized, vulnerable neonates.

Britt F. Pados

141 An Integrative Review of the Relationship Between Intrauterine Devices and Bacterial Vaginosis

This integrative review demonstrates that the copper intrauterine device may be associated with an increased risk for bacterial vaginosis.

Ariel L. Daniel, Samantha Auerbach, Danielle Nazarenko, Kafuli Agbemenu & Rebecca Lorenz

152 **CNE** Systematic Review of Obstetric and Neonatal Complications Associated With Female Genital Mutilation

Female genital mutilation (FGM) may be associated with negative obstetric and neonatal health outcomes, particularly in cases of FGM Types II and III.

Jeanne Bertuit, Andy-Muller Luzolo Nzinga, Mélinée Le Jaouan & Veronique Feipel

REFLECTIONS

162 My Patient Regina

A nurse cares for a family enduring profound loss on the labor and delivery unit.

Luann B. Slusher
