# DIAGNOSIS AND MANAGEMENT OF PERINATAL DEPRESSION

### EDITORIAL & UPDATES

#### FROM THE EDITOR

253 Publishing Decisions and Clinical Relevance

*The clinical relevance of published manuscripts needs to be considered when discussing implications for practice.*

Heidi Collins Fantasia

#### RESEARCH & PRACTICE BRIEFS

255 Hypertensive Disorders of Pregnancy and Future Cardiovascular Events

Jennifer P. Hellwig

#### COMMENTARY

262 Gender Binaries in Nursing: A Critical Shift to Postgenderism

*Nurses must act as change agents to implement concepts of postgenderism to help promote health care access, inclusivity, and safety in reproductive care.*

Keri Durocher & Claudia Susana Caxaj

### CLINICAL EVALUATION & IMPROVEMENT

269 Implementation of the Maternal Fetal Triage Index to Improve Obstetric Triage

*The MFTI facilitates effective evidence-based triage of pregnant women by improving timeliness of care, rapidly identifying clinical needs, and promoting an environment that supports patient safety and favorable health outcomes.*

Julie Mayberger, Jennifer Cera, Sheri Rowland, Leeza Struwe & Sue Barnason

278 Women's and Nurses' Perceptions of Visitor Restrictions After Childbirth During the COVID-19 Pandemic

*Women's and nurses' perceptions of visitor restrictions after childbirth during the COVID-19 pandemic were varied, with positive and negative responses noted from both groups.*

Christine Elling, Martha Rider Sleutel, JoNell Wells, Patricia Newcomb, Ericka Valdez, Krystal Walker & Tina Nguyen

288 Descriptions of Maternal Mortality From Nurses Who Practice in Perinatal Settings

*Nurses need education on substance use disorders in the perinatal period, guidance on how to support women in the postpartum period, and support for coping with maternal mortality.*

Kalyn M. Renbarger, Elizabeth McIntire, Renee Twibell, Allyson Broadstreet, Jean Marie Place, Kristin E. Trainor, Holly Jones & Sindee Fry

299 Factors Associated With Exclusive Direct Breastfeeding in the First 3 Months

*Direct breastfeeding on demand of infants ages 1 to 4 weeks helps establish exclusive direct breastfeeding, whereas the use of nipple shields and pacifiers, as well as a mother's perceptions of insufficient milk, may hinder this process.*

Natsuko K. Wood, Tamara Odom-Maryon & Denise A. Smart

### REVIEW

308 **CNE** Early Recognition and Treatment for the Optimal Care of Individuals With Peripartum Cardiomyopathy

*Treatment of individuals with peripartum cardiac myopathy requires a multidisciplinary approach and prompt diagnosis and initiation of treatment to optimize potential for long-term recovery.*

Courtney A. LeBlanc & Kathryn Johnson

### IN PRACTICE

318 Diagnosis and Management of Perinatal Depression

*Perinatal depression is a pervasive issue with potential long-term, detrimental sequelae; thus, it is crucial for health care providers to diligently screen, educate, and treat individuals with perinatal depression.*

Nicole Marie Rossi & Lauren Radney

Continued

## REFLECTIONS

### 334 Therapeutic Communication . . . or Lack Thereof

*Active listening, building rapport, and therapeutic communication are the foundation of delivering high-quality care.*

Keeya Lewis
