WATER BIRTH POLICIES

EDITORIAL & UPDATES

FROM THE EDITOR

239 Addressing Vaccine Hesitancy During the Perinatal Period

Nurses play a significant role in addressing vaccine hesitancy, encouraging immunizations, and understanding the evidence base that supports immunization recommendations.

Heidi Collins Fantasia

RESEARCH & PRACTICE BRIEFS

242 “Eat, Sleep, Console” Approach to Care of Opioid-Exposed Neonates

Jennifer P. Hellwig

CLINICAL EVALUATION & IMPROVEMENT

250 Content Analysis of Water Birth Policies With Implications for Practice and Research

CNE

The application of evidence-based practice for water birth may be impeded by the significant variation in eligibility criteria and referenced research found among water birth guidance documents.

Lorraine M. Garcia, Jennifer Vanderlaan,
Foster C. Kamanga & Brandi Ann Graham-Wood

262 Long-Acting Bupivacaine for Pain Control After Cesarean Birth

Liposomal bupivacaine wound infiltration and transversus abdominis plane (TAP) block were associated with lower pain scores and a reduction in use of opioids compared with the standard of care after cesarean birth.

Allison F. Peebles, Alexandra Mouch, Rose A. Maxwell,
Theresa Ruby & Marilyn J. Kindig

270 An Initiative to Improve Postpartum Discharge Education

The educational resources of the POST-BIRTH Warning Signs Program provide nurses and consumers with consistent messaging on potential postpartum complications.

Patricia D. Suplee, Robyn D’Oria, Kelly Larson,
Deborah Kilday, Christine Eymold & Brea Onokpise

283 Effects on Neonatal Abstinence Syndrome of Parental Caregivers’ Ability to Leave the Postpartum Unit During the COVID-19 Pandemic

Limiting parental caregivers’ ability to leave the postpartum unit during the COVID-19 pandemic was associated with a decrease in transfers to the NICU for pharmacologic treatment of neonatal abstinence syndrome.

Tia Cooney, Ursula Cote, Erin Bergen, Alex Dampier,
Lindsay Inkila & Crystal Edwards

291 Patient-Centered Intimate Partner Violence Screening, Brief Intervention, and Referral to Treatment

Using a reliable screening tool for intimate partner violence (IPV) as well as providing education for patients and staff may increase rates of IPV screening and referral to appropriate resources.

Angela Price & Kimberly Couch

IN PRACTICE

301 Fetal Care Nursing—The Birth of a Specialty

This article describes the evolution and uniqueness of the role of the fetal care nurse and the need to formalize practice and professional development standards.

Katie Francis, Abigail Wilpers, Barbara Eichhorn,
Kristine Rimbos, Nicole Pedersen & Kristen A. Gosnell

308 Using a Structural Intersectionality Approach to Understand Drivers of Health Inequities

A structural intersectionality approach to nursing care and research is critical to understanding and addressing maternal health inequities experienced by minoritized groups.

Shewit Jaynes, Kortney Floyd James & Jewel Scott

REFLECTIONS

314 The Impact of Family Presence in Surgical Settings

After major surgery at a facility where her wife was prohibited from being in the surgical setting, a nurse practitioner encourages others to advocate for family presence and respectful care.

Elizabeth Piette

Continued

317 Valuable Support After My First Adverse Event

A good charge nurse can see the effect an unanticipated emergency has on the staff and knows the support of colleagues is critical.

Colleen Fischer
